# RULES FOR THE PRONUNCIATION

OF THE

# FRENCH VOWELS AND DIPHTHONGS,

CHIEFLY COLLECTED FROM

THE PROSODY of l'Abbé D'OLIVET, and from the best Writers on this Subject.

## A.

A HAS two sounds. It is long in *bās*, and short in *băt*. The English have the first sound in *bar*, and the second in *bat*.

It is long in the alphabet, but short when it is a verb or preposition: *il ă*, he has; *ă*, to.

It is short in the beginning of a word, except in *ācre*, *āge*, *āffres*, *āgnus*, *āme*, *āne*, *āpre*, *ārrhes*, *ās*; and in their derivatives, *ācreté*, *āgé*, etc.

It is short at the end of words, except those that are taken from foreign languages, wherein it is rather long, as in *sofa*, *agenda*, etc.

(1) *Abe* is long only in *astrolābe* and *crābe*.

*Able* is long in most verbs and substantives, except *tăble* and *érăble*, wherein it is short, as in all adjectives, according to M. D'Olivet; and doubtful according to M. Féraud. Custom seems to be in favour of the latter (2).

*Abre* is long, even before a masculine (3) termination: *sābre*, *sābrer*, etc.

*Ac*. General rules. — All final syllables are short, when the vowel is followed by a consonant which is not, *s*, *z*, or *x*: *săc*, *nectăr*, *sĕl*, *pŏt*, *ŭf*, etc.

— All masculine syllables, long or short in the singular number, are always long in the plural: *des sācs*, *des sēls*, *des pōts*, etc.

— All masculine nouns that end their singular number with *s*, *z*, or *x*, are long: *le tēmps*, *le nēz*, *la vōix*, etc.

*Ace* is long only in *grāce*, *espāce*, *je délāce*, *lāce*, *entrelāce*.

*Ache* is long only in *lāche*, *tâche* (a task), *gâche*, *relâche*, *mâche*, *fâche*, and verbs derived from them, even before a masculine syllable: *lâcher*, *relâ-*

*..le* is long only in *il rācle*, *il débācle*; doubtful in all others.

*..re* is long only in *ācre* (sharp, sour).

*..de* is always short: *aubăde*, *jăde*, etc.

*Adre* is short only in *lădre*; long in all other words, even before a masculine syllable: *cādre*, *cādrer*, etc.

*Afe*, *aphe*, are always short: *carăfe*, *épităphe*, etc.

*Affres*, *afre*, are long only in *āffres* and *bāfre*.

*Afle* is long even before a masculine syllable: *rāfle*, *rāfler*, etc.

*Age* is long only in *āge*.

*Agne* is long only in *gâgne*, and all the tenses of the verb *gâgner*.

*Ague* is always short: *băgue*, *dăgue*, etc.

*Ai*, a false diphthong which admits of the three sounds of the masculine *e*,

---

(1) These rules chiefly relate to final syllables, the sound of which is more easily distinguished.

(2) A doubtful vowel is long when its word ends a sentence, and generally short when another word comes after it. Such vowels, in the dictionary, are printed in Italic type.

(3) A syllable is termed feminine when it ends with an *e* mute, like *sobre*, *aimes*, *parlent*. All other terminations are masculine.

has the sound of the close *é* only in *j'āi*, *je sāis*, *tu sāis*, *bāi*; of the open acute *é* in the middle, and at the end of words, except in *essai*, *délai*, *vrai*, wherein it is doubtful, according to M. D'Olivet; long and open according to M. Féraud; and of the open grave *è*, when followed by *e*, *s*, *rs*, *ts*, *re*, and when it has the circumflex accent: *plaīe*, *jamaīs*, *paīrs*, *portraīts*, *faīre*, *faīte*, etc.

*Aie* is always long. General rules: All vowels immediately followed by an *e* mute are long: *plaīe*, *pensēe*, *joīe*, etc. Except when there is a liquid articulation as in *pāye*. But many authors change the *y* into *i*, and write *paie*, in which case there is no occasion for this exception.

When a vowel meets any other vowel but the mute *e*, it becomes short, as *i* is long in *je līe*, and short in *nous līons*.

*Aigne* is always short: *châtaĭgne*, *dédaĭgne*, etc.

*Aigre* is always short: *aĭgre*, *maĭgre*, etc.

*Ail* is always short. General rule: All final syllables are short that end with a liquid *l*: *éventăil*, *solĕil*, *sĕuil*, etc.

*Aille* is short in *médăille*, *je travăille*, *détăille*, *émăille*, *băille* (I give), and in all the tenses of these verbs. It is long in all other words, even before a masculine syllable: *răille*, *răillons*, etc.

*Aillet*, *aillir*, are always short: *păillet*, *jăillir*, etc.

*Aillon* is short only in *médăillon* and *batăillon*, and in these verbs *nous détaĭllons*, *émaĭllons*, *travaĭllons*, *băillons* (we give); but long in *nous baīllons*, (we yawn), and in all other words.

*Aim*, *ain*, *im*, *in*. General rule: All nasal vowels, followed by a consonant which begins another syllable, are long: *jāmbe*, *mēntor*, *bōmbe*, *crāindre*, etc.

But when the *m* or *n* are doubled, there is no nasal sound, and the vowel is short: *épigrămme*, *persŏnne*, etc.

An exact standard for this nasal sound is not to be found in the English pronunciation. However something like it is heard in the word *hang*. But it must be seized immediately preceding the articulation of the *g*. With regard to this and other nasal sounds, as *on*, *un*, I must observe what M. Walker very properly remarks with regard to the sound of *en* in *encore*. «If, in pronouncing these *sounds*, the tongue should once touch the roof of the mouth (as it happens in pronouncing *man*, *men*, *sin*, *son*, *sun*), the French nasal sound would be ruined.»

The French standard for this is *in* in *vin*.

*Aime*, the only word that has this termination is short.

*Aine* is long only in *hāine*, *chaīne*, *gāine*, *traīne*, and in their derivatives.

*Air* is doubtful in the singular, and long in the plural: *éclaīrci*, *éclaīrs*, etc.

*Aire*, *ais*, *aix*, *aise*, *aisse*, are always long: *paīre*, *palaīs*, etc.

*Ait*, *aite*, are long only in *plaīt*, *naît*, *repaît*, *faīte*, (top).

*Aître* is always long: *maître*, etc.

*Ale* is long only in *hāle*, *pāle*, *un māle*, *rāle*, and in their derivatives: *hāler*, *pāleur*, etc.

*Alle* is always short: *mălle*, etc.

*Am*, *an*, *em*, *en*. This nasal vowel has four sounds: it is always long when spelt with an *a*, except in *comptant* (*ready money*).

When it is spelt with *e*, it is 1st. long in the beginning and in the middle of words, and at the end of adjectives, as in *prudēnt*, *ensēmble*, *exēmpt*, etc.

2dly. Generally short at the end of substantives and adverbs, as in *vĕnt*, *sagĕment*, etc.

3dly. Short and slender in *miĕn*, *tiĕn*, *siĕn*, *biĕn*, *liĕn*, *riĕn*, etc.

4thly. Long and slender in the plural of these words, in *mēntor*, and some other words, wherein it has the sound of *in* in *vin*.

The first sound is heard in the two syllables of *ēnfānt*, and in the first of *ēncore*, which the English have adopted with its nasal sound.

The second has for standard *en* in *vĕnt*. Those who can pronounce *en* in *encore*, may easily obtain its short sound by dwelling less upon it. Something like it is heard in the word *sand*.

The third, heard in the last syllable of *lien*, has something like it in the word *send*.

The fourth, heard in *mēntor*, has the sound of *in* in *vin*. See under *Aim* what is said of the nasal sounds.

In the following Dictionary the three first sounds of that nasal vowel are always spelt *en*, except after the hard *g* and *k*, where the *a* is better calculated to preserve the hard articulation of these two consonants.

*Ame* is long only in *âme*, *infâme*, *blâme*, *il se pâme*, *un brâme*; in the preterits, *nous aimâmes*, etc. and in *flâmme*, although the *m* be doubled.

*Anne*, *Anne*, are long only in *crane*, *âne*, *mânes*, *la mânne*, *une mânne*, *dâgne* and *condâmne*.

*Ape*, *Appe*, are long only in *râpe*, and in the verb *râper*.

*Apre* is always long.

*Aque* is long only in *Pâques* and *Jâcques*.

*Ar* is always short. N. B. Many except *char* and proper names, as *César*, *Gibraltar*, etc. which are pronounced long, at least, at the end of a sentence.

*Arbe*. General rule: In all syllables ending with an *r* and followed by another consonant which begins another syllable, the vowel is short; *bàrbe*, *bèrceau*, etc.

*Ard*, *Art*, are doubtful. But when an *e* mute follows the *d* or *t*, the *a* is short. See *Arbe*; *cafârd*, *cafârde*.

*Are* is always long, but becomes short before a masculine syllable: *il pâre*, *il pâra*, etc.

*Arre*. General rule: All vowels before *rr*, which form a single articulation, are long: as *ârret*, *bârre*, etc.

Exceptions to this rule will be found in their respective places.

*Ari* is long only in *hourvâri*.

*As* is generally long, as in *tâs*, *bâs*, *âs*, *Pallâs*, etc.

*Ase*. General rule: *s* or *z*, between two vowels, the last of which is an *e* mute, lengthens and opens the penultima: *bâse*, *pêse*, etc. but this penultima often becomes short before a masculine syllable, as in *pêser*, *apâiser*, etc.

*Aspe*. General rule: An *s* articulated after a vowel, and followed by another consonant, always renders the vowel short: *jâspe*, *mâsque*, *lústre*, etc.

*Asse* is long in the substantives *bâsse*, *châsse*, (shrine), *clâsse*, *échâsse*, *pâsse*, *mâsse*, (stake) and *tâsse*; in the adjectives *bâsse*, *grâsse*, *lâsse*; in the verbs *câsse*, *amâsse*, *enchâsse*, *compâsse*, *sâsse*; and in their masculine terminations, *câsser*, etc.; in words derived from, or composed of these verbs; also in these terminations of the subjunctive mood, *aimâsse*, *parlâsses*, *chantâssent*, etc. it is short in all other words.

*At* is only long in *bât*, *mât*, *dégât*, and in the third person singular of the preterit of the subjunctive: *qu'il aimât*, etc.

*Ate*, *Ates*, are long only in *pâte*, *hâte*, *il appâte*, *gâte*, *mâte*, *démâte*; and in the preterit tenses, *chantâtes*, etc.

*Atre*, *Attre*, is only short in *quâtre*; *bâttre*, and its derivatives.

*Au*, (a false diphthong) has the three sounds of the French *o*, (See *O*).

It is genemlly long and open before a feminine termination; or a consonant at the end of a word; in the plural number, and under the circumflex accent; as in *âuge*, *châud*, *mâux*, etc.

It is short in *Paul*, and before two consonants, as in *âugmenter*, etc.

It is long and broad before *re*, as in *restâure*, etc.: in all other cases it is generally doubtful; as in *audace*, *épauler*; *joyau*, etc.

*Ave* is short in *râve*, *câve*, etc.; oftener long, as in *grâve*, *entrâve*, etc.; and doubtful, in *brave* and *Batave*.

*Avre* is always long; *cadâvre*, etc.

*Ax*, *Axe*, are always short; *thorâx*, *parallâxe*, etc.

## E.

The French Academy distinguishes three sounds of this letter: the *close*, the *open*, and the *mute*.

But the open may be more or less so. It is a little open in *ferme*; and entirely so in *procès*. When it is a little open, the Academy calls it open acute, and assigns for its standard the first *e* in *trompette*. Dumarsais, and others, call it the *common* or *middle e*: when it is entirely open, it is called *open grave*. Therefore we must distinguish three masculine *és*, viz. the *close*, the *open acute*, and the *open grave* (1).

(1) We confine the sounds of the masculine *é* to the three noticed by the Academy, because those who have distinguished more have rather perplexed than perfected the pronunciation of this letter. Besides, as Mr. D'Olivet observes, «it is useless to anatomise sounds so much.»

These are termed masculine, in opposition to the mute *e*, which is the sign of the feminine gender in most adjectives, and all past participles.

The close *é* is so called from its being pronounced with the mouth almost closed, and from its slender sound.

It may be deemed short, if compared with its feminine termination, wherein the *e* mute obliges us to dwell somewhat more upon it, as is obvious in *aisé*, *aisée*; but it is long, if compared with the open acute, which is shorter, though it frequently bears the same accent. This is observable in *créé*, wherein the first *é* is somewhat more open than the last, and evidently shorter, according to the general rule which is to be found after the termination *ÉE*. See *ÉE*.

The natural standard for this *é* is the primitive sound by which it is known in the French alphabet, as in *bonté*, and answers to the first letter in the English alphabet, as in *fate*.

The open acute *é* is so named from being somewhat more open than the close *é*, and from the acute accent which it frequently bears. It is found in the first *é* of *créé*, or *trompette*, and is the same as in the English words, *met*, *ebb*; it is always short.

The open grave *è* is so called from requiring a greater opening of the mouth, and from the grave or circumflex accent which generally attends it, as in *après* and *tête*. It is similar in sound to the English *e* in *there*.

« The mute *e* is a mere emission of the voice, which is hardly heard; it is so imperceptible, that a man born blind could not find the least difference in hearing *froc*, or *froque*, *crép*, or *crépe*. » D'Olivet.

Dumarsais thinks that the articulation of the consonant by which it is preceded, is sufficient to express it, as in *mner*, and *dmender*, the explanatory spelling of *mener* and *demander*. However in monosyllables, and in the first syllables of other words, the imperfect sound of this letter is more perceptible, and may be termed *guttural*.

At the end of polysyllables, where it is entirely mute, it is like the second *e* in *there*, and generally serves to lengthen or open the preceding vowel: when it is more perceptible it is like the *e* in *battery*, or *over*; and even then the French suppress it as often as they can, especially when the preceding or following syllable has a full sound.

P. Catineau the last grammarian who has written on this subject, gives the following example, which is very correct: « *Quand vous serez le même, vous me trouverez le même.* This sentence contains thirteen syllables in prose, *quand-vous-se-rez-le-même-vous-me-trou-ve-rez-le-même.* In poetry *même* would have two syllables. However, in familiar reading and conversation, it is pronounced in eight syllables only, *quand-vou-srel-même-voum-trouv-rél-même.* » The suppression of that *e* is precisely the reason why foreigners imagine the French to speak so very quick.

This imperfect sound is never suffered in two syllables together at the end of a word. To avoid this dissonance, it is changed into an open *è*, in the penultima of verbs, when their last syllable becomes mute, as *mener, mène*; some words double their consonant, (which produces the same effect), as *tenir, que tu tiennes*; others change that *e* into the diphthong *oi*, as *devoir, doivent*.

When the pronoun *je* comes after its verb, it produces the same effect, so that *je chante, je mène*, become *chanté-je? mené-je?* And in this case the guttural *e* of *mener* that had become open acute in *mène*, becomes again guttural in *mené-je?*

E, when under the acute accent, is generally close at the end of words, as *bonté, aisé*: 2dly. in adverbs derived from adjectives ending in *é*, as *aisément*: 3dly. before the feminine termination of adjectives where it is somewhat longer, as in *aisée*; in any other place it is almost always open acute (1). It is close likewise in

(1) It has been thought proper to adhere to the ancient custom of writing this second *e* with the acute accent, to avoid the double mistake frequently occasioned by those who of late have written it with the grave accent, in some terminations, as *ece*, *ede*, etc. Those who are unacquainted with Mr. D'Olivet's rules, being misled by the grave accent, give to that *é* the sound of the open grave *è*, whilst, on the other hand, they are induced to confound with the close *é*, all the open acute ones, which have not been subjected to this partial reform. A little attention to the above rule will be sufficient to prevent the mistaking of the close *é* for the open acute. As to the exceptions to this or any of these rules, the similar spelling of every word will remove all doubts.

the termination *ez* and *er*, when the *r* is silent; and open acute in any other place where it is not open grave, or doubtful.

It is generally open grave under the circumflex, and grave accent, sometimes doubtful, as will be seen hereafter.

N. B. The following rules relate to the *open*, *acute* é, and to the *open grave*, when the word *close* is not mentioned.

*Ecle*, *Ebre*, *Ec*, *Ece*, are always short; *bĕc*, *niĕce*, etc.

*Eche*, is long only in *bèche*, *lèche*, *grièche*, *pêche*, (fishing, or peach), *revèche*, *il pêche* (he fishes) *dépêche*, *empêche*, *prêche*, and in all the tenses and persons of these verbs.

*Ecle*, *Ect*, *Edle*, *Eder*, are always short: *siĕcle*, *irrécte*, *cĕder*, etc.

*Ee* is always long and close, as in *aimée*, etc. See *Aie*.

*Ee*. General rule: All vowels before another vowel which is not the mute *e*, are short; *crĕé*, *fĕal*, *hăir*, etc.

*Ef* is always short; *Effe*, *Efle*, are long only in *grêffe* and *nêfle*.

*Ege* is always long; *collège*, etc. M. Feraud makes it short. The prevailing custom seems to be for pronouncing it long at the end of a sentence, and short in any other place.

*Egle* is always short; *rĕgle*, *sĕigle*, etc.

*Egne* is doubtful; *règne*, *douègne*, etc.

*Eille* is long in *vieille*, *vieillard*, *vieillesse*, which have the sound of the close *é*.

*Ein*, *Einte*, are always long. See *Aim*.

*Eine* is long only in *rêine*.

*Eitre* is long only in *Réitre*.

*Ete* is long only in *zèle*, *poêle*, *frêle*, *pêle-mêle*, *grêle*, *il se fête*, *il bêle*.

*Em*, *En*. See *Aim* and *An*. But there is no nasal sound in *Bethléem*, *item*, *amen*, *hymen*, etc. And whenever the *m* or *n* is articulated, the *e* is open acute.

*Eme* is short only in *sĕme*. It is doubtful in *crème*; and long in any other word. However the terminations in *ieme* are frequently heard short before another word.

*Ene* is long only in *cène*, *chêne*, *scène*, *gêne*, *alêne*, *rêne*, *frêne*, *arêne*, *pêne*, and in all proper names. *Enne*, is always short, *étrenne*, etc.

*Epe* is always long; *crêpe*, etc.

*Epre* is short only in *lépre*, etc.

*Epte*, *Eptre*, are always short; *précepte*, *scĕptre*, etc.

*Eque* is long only in *évêque*, *archevêque*.

*Er* is long and open in *fer*, *enfer*, *mêr*, *amêr*, *hivêr*: long and close in *légêr*, *altièr*; and in all nouns and verbs, as *aimêr*, *bergêr*, etc. when the *r* is silent: but when the *r* is articulated, as it must be, especially in verbs, before a word beginning with a vowel, the *e* is open acute, and short.

*Erbe*, *Erce*, *Erse*, *Erche*, *Ercle*, *Erde*, *Erdre*, are all short. See *Arbe*.

*Erd*, *Ert*, are doubtful; *il perd*, *désert*, etc.

*Ere* is doubtful, *frère*, *chimère*, etc. but it is constantly long in the third plural persons of verbs; *ils espêrent*, *parlêrent*, etc.

*Erge*, *Ergne*, *Erle*, *Erme*, *Erne*, *Erpe*, *Erle*, *Ertre*, *Esque*, *Este*, *Estre*, are all short. See *Arbe*.

*Errc* is always long, even before a masculine syllable; *guêrre*, *vêrrons*, etc.; but it is short when the two *rr* are heard separately, as in *ĕrreur*, etc.

*Esse* is long only in *abêsse*, *profêsse*, *confêsse*, *prêsse*, *comprêsse*, *cêsse*, *lêsse*, *exprêsse*, *il s'emprêsse*, *il profêsse*.

*Et* is long only in *arrêt*, *bênet*, *forêt*, *genêt*, *prêt*, *aprêt*, *acquêt*, *intérêt*, *têt*, *protêt*, *il êst*.

*Ete* is long only in *bête*, *fête*, *arbalête*, *boête*, *tempête*, *quête*, *conquête*, *enquête*, *requête*, *arrête*, *crête*, *tête*: it is doubtful in *êtes* and *honnête*, and short in all the rest.

*Etre* is long only in *être*, *salpêtre*, *ancêtre*, *fenêtre*, *prêtre*, *champêtre*, *hêtre*, *chevêtre*, *guêtre*, *je me dépêtre*.

*Eu*; this diphthong has three different sounds: it is long and close in *jêune*, (fasting); short in *jĕune*, (young); long and open in *bêurre*.

The first has no standard in English; but it may be obtained by pressing the lips a little forward, in such a manner, as to leave to the breath a narrower passage than for the *e* of *over*, and by dwelling longer upon it.

The second is somewhat more open than the *e* of *over*, and can hardly be distinguished from it.

The third may be obtained by opening the lips somewhat wider, and in a more circular form, than for the *e* of *over*, and by protracting the sound (1).

*Eu*, unless accented, is short in the beginning and in the middle of words, *hĕureux*, *dĕnĕuter*, etc.; it is doubtful at the end; *fēu*, *jeu*, etc.; and when it is long it has the close sound of *eu* in *jeûne*, unless it be followed by an *r*.

*Euf* is always short: *nĕuf*, *vĕuf*, etc.

*Eule* is long only in *mēule*.

*Eune* is long only in *jēune*; (fasting).

*Eur* is generally short, *lĕur*, *pĕur*, etc.; it is doubtful in *cœur*, *chœur*, *sœur*; and long open in all plural nouns.

*Eure* is doubtful, but always open, *heure*, *inférieure*, etc.

*Evre* is doubtful, *levre*, *sevre*, etc.

*Eux*, *Euse*, are always long and close; *fēux*, *jēux*, *heurēuse*, etc.

*Eve* is long only in *trēve*, *grēve*, *rēve*, *rēver*: it is doubtful in *fève*, *brève*, *il achève*, *crève*, *se lève*, although mute in *crever*, *achever*, *se lever*.

*Ex*, *Exe*, are always short, *perplĕx*, *sĕxe*, etc.

---

N. B. All the terminations of the three following vowels, which are not noticed in these Rules, are constantly short.

## I.

This letter has two sounds. It is long in *gīte*, and short in *amĭ*. The standard for the first in English is *ie* in *field*, and of the second *i* in *fig*.

*Idre* is long only in *hīdre* and *cīdre*.

*Ie* is always long. See *Aie*.

*Ien* when it is dissyllable, both syllables are short, as in *lĭ-ĕn*; but it is doubtful when it is monosyllable, as in *mien*, *tien*, etc.; when it is long it has the sound of *in* in *vin*. See *An*.

*Ige* is doubtful, as in *tige*, *prodige*, *litige*, *il oblige*, etc.

*Ile* is long only in *īle*, *huīle*, *stylе*, *tuīle*, *presqu'īle*.

*Im*, *In*. See *Ain*.

*Imes* is long only in *abīme*, *dīxme*, and in the preterit tenses, *vīmes*, *prīmes*, etc.

*Ire* is doubtful: *empire*, *soupire*, etc.; but always long in the preterit tenses, *prīrent*, *punīrent*, etc.

*Ise* is always long; *surprīse*, etc.

*Isse* is long only in these terminations of the subjunctive; *fīsse*, *prīsses*, *punīssent*, etc.

*It* is long only in the preterit of the subjunctive; *qu'il prīt*, *qu'il fīt*, etc.

*Ite* is long in *bénīte*, *gīte*, *vīte*, and in the preterit tenses, *vītes*, *finītes*, etc.

*Itre* is long in *épītre*, *huītre*, *litre*, *regītre*; but short in *regĭstre*, and all the rest.

*Ive* is long only in adjectives; *vīve*, *craintīve*, etc.

*Ivre* is long only in *vīvre* (substantive).

## O.

This letter has three sounds. It is long and open in *trône*, short in *nŏble*, long and broad in *aurōre*.

N. B. This third sound has not, I believe, been noticed by any grammarian. However the pronunciation of *o* in *aurore*, *corps*, *alors*, etc. as *o* in *trône* or *noble*, would be highly improper.

This sound is regularly found before an *r* supported by other consonants, or an *e* mute; and before an *r* alone when its word ends a sentence.

---

(1) No grammarian, I believe, has ever distinguished this third sound, so different from the two first. Hence some pronounce *bēurre*, *lēurre*, etc. with the sound of *eû* in *jeûne*, which is a very vicious pronunciation; for in French, as in English, the *r* generally opens the sound of the preceding vowel. By others, and especially by foreigners, *feux*, *aïeux*, *généreux*, *jeûne*, etc. are pronounced with the sound of *eu* in *beurre*, which is no less exceptionable.

The standard in English is, for the first, *o* in *robe*; for the second, *o* in *rob* for the third, *o* in *told*.

*O* in the beginning of a word, is long only in *ōs*, *ōsier*, *ōter*, *hōte*.

*Obe* is long only in *glōbe* and *lōbe*.

*Ode*, *Oge*, are long only in *rōde*, *dōge*.

*Oi* a diphthong that sometimes has the sounds of *wa* in *wār*, or *wăr*; sometimes those of *e*, in *thēre* or *ĕbb*. It is doubtful at the end of words where it has always the sounds of *wā* or *wă*, *moi*, *toi*, *Roi*, etc.

*Oie* is always long: *jōie*, etc.

*Oient* a false diphthong that has always the sound of the open grave *è*, *ils aimōient*, etc.

*Oin* a diphthong which has the sound of *in* in *vin*, preceded by the English *w*. See *Aim*.

*Oir* is doubtful: *savoir*, *espoir*, etc.

*Oire* is always long: *bōire*, *mémōire*, etc.

*Ois*, *oise*, *oisse*, *oitre*, *oivre*, are always long, whether they have the sound of *wā*, or of an open grave *è*.

*Oit* is long only in *il paroīt*, *connoīt*, and *croīt* (*he increases*).

*Ole* is long only in *drōle*, *pōle*, *gvōle*, *mōle*, *rōle*, *contrōle*, *il enjōle*, *enrōle*, *vōle*, (*he steals*).

*Om*, *on*. This nasal vowel has no exact standard in English; but something like it is heard in *song*. See *Aim*. In French its standard is *on* in *mon*, and it is always long.

*Ome* is short only in *Rome*. *Omme* is always short.

*One* is always long when the *n* is not doubled: *trōne*, etc.

*Or* is always short, according to M. D'Olivet. M. Féraud makes it short only in *castŏr*, *butŏr*, *encŏr*; but longer in all the other words, when *r* is followed by a *d* or a *t*. The opinion of the latter seems to prevail, especially when the word ends a sentence. Therefore, *o* in *or*, *essor*, *port*, *bord*, etc. should be placed in the class of the doubtful vowels.

*Ore* is always long and broad: *encōre*, *évapōre*, etc. But it becomes short before a feminine syllable: *évapŏrer*, etc. unless followed by two *rr*, which form a single articulation, as in *colŏrrai*, etc.

*Os*, *ose*, are always long: *repōs*, *oppōse*, etc.

*Osse* is long only in *grōsse*, *fōsse*, *endōsse*, *engrōsse*, and in their derivatives, which preserve the *ō* long even before a masculine syllable: *grōsseur*, etc.

*Ot* is long only in *impōt*, *lōt*, *dépōt*, *entrepōt*, *suppōt*, *prévōt*, *rōt*.

*Ote* is long only in *hōte*, *côte*, *maltōte*, *ōte*. The three last preserve the *ō* long before a masculine syllable: *côté*, *ōter*, *maltōtier*, etc.

*Otre* is long in *apōtre*, and doubtful in *nôtre* and *vôtre*.

*Ou* a false diphthong, which is long in *roûle*, and short in *bŏule*.

The first has for its standard, in English, the two *oo* in *mōod*; the second, the two *oo* in *good*.

*Oudre*, *oue*, are always long: *moūdre*, *je loūe*, etc.

*Ouille* is long only in *rōuille*, *il dérōuille*, *embrōuille*, *débrōuille*; but becomes short before a masculine syllable: *rōuiller*, *bróuillon*, etc.

*Oule* is long only in *mōule* (*muscle*), *la fōule*, *sōule*, *il fōule*, *écrōule*, *rōule*.

*Oure* is doubtful: *bravoure*, etc.

*Ourre* is always long; but *ourr* becomes short before a masculine syllable, contrary to the rule after *Arre*; *cōurrier*, *bóurrade*.

*Ousse* is long only in *pōusse*.

*Out* is long only in *août*, *cōut*, *gōut*, *mōut*.

*Oute* is long in *absōute*, *jōute*, *crōute*, *vōute*; *il cōute*, *brōute*, *gōute*, *ajōute*, but mostly short before a masculine syllable: *jōuter*, etc.

*Outre* is long only in *pōutre* and *coutre*.

## U.

This letter has two sounds; it is long in *būse*, and short in *bŭt*.

There is no standard for these sounds in English. To form the first, observe the situation of the tongue when you pronounce the English letter *a*. It widens itself into the cheeks, so that it touches the first grinders. When the tongue is in

this situation, advance both lips a little forwards, shutting them at the same time in such a manner as to leave a narrow oval passage for the breath. This movement will lightly press the tongue between the grinders, and its tip against the fore-teeth of the inferior jaw, and thus let the breath pass which is necessary to emit the sound of the French *u*. Its short sound is formed by dwelling less upon it.

*Uche* is long only in *büche*, *embüche*, *débüche*.

*Ue* is always long: *vüe*, *tortüe*, etc.

*Uge* is doubtful: *déluge*, *juge*, etc.

*Ule* is long only in *brüle*, and in all the tenses of *brüler*.

*Um*, *un*. See *Aim*. This nasal vowel has no standard in English. Its sound is formed by lowering the interior part of the mouth somewhat more than for the pronunciation of *u*, making at the same time the opening of the lips more circular, and throwing the breath against the interior part of the roof, whilst the tongue touches lightly the grinders in removing a little from the fore-teeth of the inferior jaw.

*Umes* is long only in preterit tenses: *parümes*, *reçümes*, etc.

*Ure* is always long: *injüre*, *parjüre*, etc.

*Usse*, *usses*, *ussent*, are always long, except in *la Prüsse*, *les Rüsses*.

*Ut* is long only in *füt* (*hogshead*) *affüt*; and in the preterit of the subjunctive; *qu'il fût*, etc.

*Ute* is long only in *flüte*, and in preterit tenses, *lütes*, *parütes*, etc.

N. B. Few of these rules are without some exceptions. These exceptions, together with the pronunciation of the proper and improper diphthongs that are not noticed in these rules, and likewise the various articulations of consonants, are shewn in the similar spelling of their respective words.

But as words are spelt as they are pronounced when alone, or before a consonant, we shall particularly notice here the final consonants which cease to be silent when they meet a word beginning with a vowel.

## *Directions for the articulation of the final* consonants *before a* vowel *or* h *mute.*

1st, General Rule. — Final consonants are to be articulated before a word beginning with a vowel or H mute (1).

2d, General Rule. — All final consonants that are articulated when a word stands alone, or before the consonant of another word, preserve the same articulation before a vowel, unless otherwise mentioned in the following observations.

B is articulated only in *radoub*, and proper names, even before a consonant.

C. When the final *c* is articulated, it has the articulation of a *k*.

It is always silent in *accroc*, *arsenic*, *broc*, *cotignac*, *marc* (*weight*, *or grounds*), *estomac*, *lacs* (*love knots*); in the last syllable of *succinct*, and of *porc-épic*; and after the nasal sounds, as *banc*, *convainc*, etc.

However, it is articulated in *donc* at the beginning of a sentence and before a vowel; also in *franc-encens*, *franc-alleu*, *du blanc au noir*.

D. When the final *d* is heard before a vowel or *h* mute, it has the articulation of a *t*.

It is always silent in *sourd*, *nid*, in the terminations in *ond*, *rond*, etc. and after an *r*, as in *fuyard*, *accord*, etc.

In other words it is frequently suppressed in conversation.

It should never be suppressed, 1st. in *de fond en comble*; 2d. after *quand*, be-

(1) No rule is more frequently cited, nor has so many exceptions, even in a public speech wherein it is more strictly adhered to. On this point, harmony must be first attended to. Whenever the connexion of a final consonant produces a discordant sound, it must be avoided; for, as Mr. D'Olivet has very properly remarked, « the French prefer an irregularity to a discordance. »

Excepting the above mentioned case, the connexion should take place, even in conversation, when the first word determines, qualifies, or modifies the sound; as the article before its noun; the adjective or pronoun before its substantive; the substantive before its adjective; the noun or pronoun before its verb; the verb before its pronoun, adverb, object, or end; the adverb before an adjective or participle,

fore *il, ils, eux, elles, on, en, a, au, aux*; 3d. after adjectives followed by their substantives: *grand homme, grand arbre*, etc. 4th. after the third person of verbs, when they are followed by their pronoun personal, or the preposition *à*; *répond-il? il entend à demi*, etc.

F. The final *f* is generally articulated even before a consonant.

It is silent, even before a vowel; 1st. in *baillif, clef, cerf*; but is always heard in *corne de cerf*; 2d. in *chef* and *nerf* when used in the following expressions, *chef d'œuvre, nerf de bœufs*, although it must be articulated in any other place; 3d. in plural nouns, as *bœufs, œufs*, etc. except *chefs*, wherein it is always articulated.

G. The final *g*, when it is not silent, has the articulation of a *k*.

It is articulated, 1st, in *sang* and *rang* before an adjective, *sang échauffé, rang élevé*, etc. 2d, in these or similar sentences, *suer sang et eau, de rang en rang*, etc. 3d, always in *bourg*.

According to M. Féraud it is also heard in *long* before a substantive: *long été*, etc. which he spells *lon-été*. The word *long* before a vowel is generally avoided, or the *g* suppressed in the pronunciation.

In *joug* some pronounce it as *g* in *bag*, even before a consonant; others suppress it even before a vowel.

H. *H* is seldom, and ought never to be final in French. It has no articulation.

When it is deemed aspirate, « it only communicates to the vowel the properties of a consonant; that is to say: if the preceding word ends with a vowel, that vowel is never suppressed; if it ends with a consonant, that consonant is never connected with the vowel which follows. To this is confined all the effect of the aspirated *H.* » *D'Olivet.*

This pretended aspiration, so different from that of the English, is nothing else than the hiatus occasioned by the meeting of two vowels, as in *go on, go again.*

N. B. The *h* is preserved in the similar spelling only in words before which no vowels is suppressed, and with which no consonant is connected.

It is proper to notice here some irregularities of this letter.

In conversation or prose *h* is mute in *Henry*; it may be aspirated in poetry.

According to the Academy it is better to aspirate it in *hideux*. The contrary custom still prevails.

It is aspirated in *Holland* and *Hongrie*, but mute in *toile* or *fromage d'Hollande, Reine* or *point d'Hongrie.*

It is mute in *huit* and its derivatives; however we spell and pronounce *le huit, le huitième, la huitaine*, as if it were aspirated.

*Onze* and its derivatives, and *oui* used substantively, produce the effects of the aspirated *h*. No vowel is suppressed before these words, nor any consonant connected with them, *les onze, les onzièmes*, etc. *le oui et le non, tous vos oui*, etc. although we spell and pronounce *je crois qu'oui*, instead of *je crois que oui.*

L. The final *l* is never pronounced in *baril, chenil, fusil, gentil, gril, outil, sombril, persil, soul, sourcil, pouls, fils, cul.* But *gentil* in *gentil-homme*, and *gril* in verses, take the liquid articulation of *gl* in *seraglio.*

In conversation, some people, whom Richelet calls *refiners*, suppress it in *quelque, quelquefois, quelqu'un*, though they pronounce it in *quel* and *quelconque.* They suppress it likewise after the pronouns *il, ils*: and instead of pronouncing *il dit, ils ont dit, parle-t-il encore?* as if spelt *il di, il-zon-di, parl-ti-len-kor?* pronounce *i-di, i-zon-di, parl-ti-en-kor?*

M. Chambaud observes, with regard to this last point, that the *l* cannot be silent in reading; and that it would be better to pronounce it always, to avoid *double meanings.* Since this suppression of the *l* may occasion ambiguity, it cannot be too carefully avoided.

M. The final *m* is never articulated when it makes a nasal sound. It is always articulated in *hem! item*, and in foreign names, *Amsterdam*, etc. However *m* is silent in *Adam* and *Absalom*, which have a nasal sound.

N. The final *n*, when it makes a nasal sound, is articulated before a vowel only in the following cases:

1st, Adjectives before their substantives, and *mon, ton, son, rien, un*, and *bien* (adverb), lose their nasal sound in connecting their *n* with a following vowel; *certain auteur, divin amour, bon ami, rien au monde, un homme, bien-aimé*, etc. pronounce *cer-té-no-teur, di-vi-na-mour, rié-no-monde, bo-na-mi, u-nom, bié-ne-mé.*

2d, *Benin* and *malin* ought not to be placed before a substantive, except *malin esprit*, wherein *malin* preserves its nasal sound, and a second *n* is articulated before *esprit*: *malin-nespri*.

3d, *En* and *on* preserve their nasal sound, but a second *n* is articulated before a vowel: *en entrant*, *on assure*, etc. pronounce *en-nen-tran*, *on-na-sure*. But the first after an imperative and the second after its verb, are never connected; *par-le-n à votre ami*, *a-t-on appris*, etc.

P. The final *p* of *coup*, *beaucoup*, and *trop*, and of the words that have it articulated before a consonant, are the only ones heard before a vowel.

Q. When the final *q* is not silent, it has the articulation of a *k*. It is always heard in *cinq*, when alone, and before a vowel: also in *coq*, but never in *coq-d'Inde*.

R. The final *r* is generally articulated before vowels, at least in reading.

Except, 1st, *Monsieur* and *Messieurs*, though it be always heard in *le sieur*, *les sieurs*.

2d, The plural of nouns ending in *er*, wherein the *s* alone is articulated like a *z*.

3d, It is often suppressed in conversation before consonants in *notre*, *votre*, *quatre*, pronounced *not*, *vot*, *quat*; but never in *Notre père qui êtes aux cieux*, *Notre-Dame*, *quatre-vingts*, nor at the end of a sentence.

4th, Sometimes also it is suppressed in conversation in the verbs and nouns ending in *er*; but never in proper names; words derived from foreign languages, nor when the *è* is open grave, as in *Jupiter*, *pater*, *mer*, etc.

5th. Some suppress it in words ending in *ir*; but it is not the prevailing custom.

S. The final *s*, in reading, is always heard before a vowel. It is articulated as in *yes*, even before a consonant, in the words *vis* and *cens*; and in the Latin, and proper names, *Pallas*, *bolus*, etc.

In any other word, before a vowel, it has the articulation of a *z*, in which case it is often suppressed in conversation, but this would be a fault in reading.

T. The *t* final is generally articulated before a vowel; except,

1st. When it is preceded by another consonant; *respect humain*, *effort étonnant*, etc.

2d. In *quatre-vingt-un*, *quatre-vingt-onze*, though it be articulated in *vingt et un*, and even before consonants in the following numbers, up to *vingt-neuf* inclusively.

3d. In all plural nouns, and in *et*, *teint*, *contrat*, *moût*, *têt*, *protêt*, *puits*.

4th. It is silent in *fort* (adjective) *fort et grand*, but articulated in *fort*, (adverb), *fort aimable*.

X. The final *x* is always articulated, 1st. as *ks* in Greek and Latin words: *stix*, *préfix*, etc.; 2d. as the *s* of *yes* in *Aix*, *Cadix*; and like a *z* in all other words, but only before a vowel.

Z. Is silent before a vowel only in the word *nez*: it is frequently suppressed at the end of other words in conversation; but these and similar licenses, though tolerated, can never be enforced as rules.

(1) The *g* and *k* in Italic type denote that, between them and the following vowel, a sound like *e* or *y* is interposed, the better to unite the letters, and soften a little their hard articulation This softened articulation of the hard c and *k*, and *g*, is noticed in Steele's Grammar, pag. 49; reproved in Nare's Orth. pag. 28, as a monster of pronunciation only heard on the English stage" It is given as polite pronunciation by Mr. Walker, who, in his pronouncing Dictionary, pag. 15 and 21, directs us to pronounce *card*, *guard*, *kind*, etc. as if spelt, *ke-hard*, *ghe-ard*, or *gyard*, *kyind*, etc.

This intermediate sound is very obvious in *cue* and *argue*, which are not pronounced *kou* and *argou*, but as if a *k* or *g* were articulated before the pronoun *you*, so that *kyou* and *argyou*, offer the same sounds as *cue* and *argue*.

The sound of this *y* between the *k* or *g* and the diphthong *ou*, is precisely that which the French interpose between them, and their *u*, as in *curé*, *légume*; and which they frequently express by an *u* after *q* or *g* before their *e* and *i* as in *manquer*, *quête*, *vainqueur*, *guette*, *guide*, *rigueur*, etc. wherein these letters are less hard than in *corps*, *garde*, though harder than in *cet*, *cité*, *gêne*, *gite*.

## *Directions for using the similar* sounds *and* articulations.

1. *The figures over the vowels mark their respective sounds. To have them perfect they must be stripped of their attending consonants, without losing any part of their peculiar sounds.*

2. *Two vowels in the same syllable are to be pronounced together, and the first shorter than the second. Thus in* piâ-tâ, *the similar sounds for* piété, *the* î *must be united with* â, *precisely as in the word* hosier, *the* i *is united with* er.

3. î *marked with the figure* 1, *is equivalent to* ie *in* field.

4. oo *in the same syllable have a single figure, to shew that they express a single sound as in* mood *or* good.

5. *A vowel in Italic type is doubtful: if it be marked* 1 *or* 3, *it takes the middle sound marked* 2, *chiefly when the word is not the last of a sentence. Thus* brav, *similar sound of* brave, *must be pronounced* brâv *before* homme, *and* brâv *after it*; brâ-vôm, ôm-brav.

*But when an Italic vowel is marked* 2 (*which happens only in the penultima of verbs*), *it takes the sound marked* 1 *before a mute termination, except* ô *and* êu, *which when followed by an* r *before the* e *mute, take the sound designed by* 3; *thus* â-vî-zâ, ô-nô-râ, dê-mêu-râ, *etc. similar sounds of* aviser, honorer, demeurer, *must become* â-vîz, ô-nôr, dê-mêur, *to represent* avisent, honorent, demeurent. *Should the termination in* êur *not be the last word in a sentence, it must have its second sound. See* pag. 12 and 13.

6. *In nouns of the singular number, the final vowel marked* 2, *undergoes the same change in the plural; thus* â-mî, trâ-zôr, flêur, *etc. similar sounds of* a-mi, trésor, fleur, *become in the plural* â-mî, trâ-zôr, flêur.

7. *The standards that have an* u, *or an* n *in Italic type, are peculiar to the French language. Look for them as directed in the foregoing table.*

8. *When* u *has no figure, it makes with the vowel* e, *one of the sounds of the diphthong* eu *in* jêûne, mêute, bêurre.

9. *The three nasal sounds that have no figure never vary.*

10. *An adjective or participle, whose feminine is not noticed in the similar spelling, is pronounced in the same manner for both genders, except the sound of* â, *which is somewhat longer for the feminine.*

11. *The syllables are divided as they are heard in conversation, and not as they are counted in poetry.*

### EXAMPLES:

Veiller, vê-lâ: *the* 2 *marks* ê *in* êbb; *the* 3 â in bâse; *and the l in Italic, the articulation of* gl, *in* seraglio. *But when it is followed by a vowel, its similar sound must be* vê-lêr. *See* pag. ix.

Courtisan, e, kôor-tî-zên, zân. *The first* 2 *denotes* ôo *in* good; *the second* î *in* fig; *the figure* 1 *and the n Italic,* ên *in* ên-fânt; *the next syllable separated by a comma, which is the feminine termination of that substantive, has the sound of* â *in* bât, *and* n *articulated as in* man.

Poignard, pwâ-gnâr. *The* 2 *marks* â *in* bât; *the* 1 â *in* bâr; gn *in the same syllable, the articulation of* gn *in* poignant: *and the* â *in Italic type denotes that* â *must be changed into* â, *when the word does not end a sentence.*

Baguenaude, bâg-nôd. *The* 2 *denotes* â *in* bât; *the* 1 ô *in* robe; *and* g- *being separated from* n *must be articulated as in* magnificent.

Guerre, gêr. *The* 1 *marks* ê *in* there; *and the g in Italic, the softened articulation of the hard g commented on after the foregoing table.*

Jour, zôor. *The* 2 *denotes* ôo *in* good; *and the z in Italic the articulation of* z *in* azure.

A [à], First letter in the alphabet, and first of the vowels.

A, s. m. *A. Un bon A*, a good A. *Il ne sait ni A ni B*, he knows not A from B, he is a mere ignoramus.

*A*, is sometimes the third person singular of the present in the indicative mood of the verb *avoir*. *Il a*, he has; *elle a*, she has; *on a*, one has, people have. *Il y a*, there is (*speaking of one*), there are (*speaking of several*).

*A*, with the grave accent over it, when not a capital, is a preposition, for which the English chiefly but not indiscriminately use *at*, *to*, *in*, *into*, *by*, *and*, *with*, *within*, *at the distance of*, *on*, *for*, *after*, *according to*, etc. *Now instead of* à le *or* à la, before a vowel not aspirate, or before h mute, the French use *a l'à*; instead of *le* before a consonant they use *au*; and instead of *à les* they use *aux*: *A ce prix-là*, at that rate; *à raison de cinq pour cent*, at the rate of five per cent; *il sera ici à dix heures*, he will be here at ten o'clock; *Elle est assise à la porte*, she is sitting at the door; *nous jouons souvent aux cartes*; we often play at cards; *il vise à cet emploi*, he aims at that place; *cela est arrivé à Paris*, that happened at Paris. *Allez à Paris*, go to Paris; *venez à Londres*, come to London; *à l'ami*, to the friend, *à l'homme*, to the man; *à l'âme*, to the soul; *au roi*, to the king; *à la reine*, to the queen; *aux officiers*, to the officers. *Il demeure à Douvres*, he lives in Dover; *votre chapeau est à la mode*, your hat is in the fashion; (see hereafter). *J'irai à la campagne*, I shall go into the country. *A la faveur de la nuit*, by the help of the night; *à force de*, by strength of, by dint of; *au moyen de*, by means of. *Bâtir à chaux et à sable*, to build with lime and sand; *travailler à l'aiguille*, to work with the needle; *à grand'peine*, with much trouble; *Je n'ai pas encore vu l'homme au nez rouge*, I have not yet seen the man with a red nose; *or* whose nose is red *A deux doigts de terre*, within two inches of the ground, *or* at the distance of two inches from the ground. *A droite*, or *à main droite*, on the right hand; *au contraire*, on the contrary. *Faites un habit à mon domestique*, make a coat for my servant. *Voulez-vous que cet habit soit à la française*? Will you have that coat be after the French fashion? (see before). *A ce qu'on dit*, according to what people say, by what people say, as people say; *à mon avis*, according to my opinion, in my opinion.

This preposition *à* is also used in reckoning games: *Quatre à rien*, four love; *cinq à cinq*, five all; *trois à quatre*, three to four; *etc. à* is also used to express a progressive succession in an ordinal march, when the word is repeated, and then *à* is equal to *by* or *and*. *Ils marchoient trois à trois*, they were walking three by three, *or* three and three; *pas à pas*, step by step. See *En*.

*The following observations will, the Editor hopes, be of service to the student:*

*I.* When a verb is found to govern an accusative in regard to the thing, whether this be expressed by a noun or by a phrase, the person (or what is used instead of the person), governed by the same verb, is generally to be considered as if affected by to (*à*, said to be the sign of the dative case), let the manner in which it is present edb ewith or without any preposition: *Elle dit la même chose à mon frère*, she tells the same thing to my brother, *or* (*by transposing the person governed before the thing governed, which transposition allows the*

*suppression of the preposition in English*), she tells my brother the same thing; *elle promit à mon frère qu'elle viendrait demain*, she promised my brother that she would come to-morrow; *nous prîmes à l'ennemi une quantité immense de provisions*, we took from the enemy an immense quantity of provisions.

*It is from the same cause that an infinitive affected by any part of* faire, laisser, voir, ouïr, or entendre (*considered each as an auxiliary verb*), *if that infinitive governs an accusative in regard to the thing, the person* (*or what is used instead of the person*), *considered as governed by the auxiliary verb, is often rendered as if affected by* to (*à*) *though the English preposition commonly used in these circumstances be* by, *when the second verb is introduced passively*: César fit promettre à Augustin de venir le voir au château, *Cæsar made Augustine promise to come and see him at the castle*; c'est un grand talent que de savoir faire aimer la vertu aux méchans, *to know how to make the wicked love virtue* (or *virtue loved by the wicked*) *is a great talent.*

*II.* The French preposition *à* is prefixed to an infinitive when the expression which governs it would require *à* (to) before the name of the thing for which the infinitive then stands, on account of a tendency towards the object, *etc* hence, *Il sera condamné à rendre l'argent*, he will be condemned to return the money (because we say *condamner une personne à une chose*, *to condemn a person to a thing.*) Or, when this infinitive has a passive meaning, though presented in its active form, in which circumstance it might govern in the accusative a preceding noun (or pronoun) which is already in one case: *La question est difficile à résoudre*, the question is difficult to solve *or* to be solved (*here*, la question *might be made the accusative of* résoudre; *for*, *we might say*, *il est difficile* de résoudre la question). *J'ai deux ou trois lettres à écrire*, I have two or three letters to write (to be written, which must be written, which I must write), *or*, I am to write (I must write) two or three letters.

*III.* As the French preposition *à*, prefixed to a noun, is often found to announce how far a qualification or modification extends, extended or may extend, so, when prefixed to an infinitive, it may be found to announce the same: *Une veste à manches*, a waistcoat with sleeves to it, *or* that has sleeves; *il aime à la folie*, he loves to distraction; *elle s'afflige à la mort*, she grieves herself to death; *c'est un homme à tout faire*, he is a man who will do any thing *or* fit for any thing; *voilà un procès à vous ruiner*, that is a law-suit which is likely to ruin you: *hence also*, un maître à danser, *a dancing-master*, or *a master who teaches dancing.*

*IV.* The French preposition *à* is often found to denote *duty*, *part*, or *business*; and even turn: *C'est à moi à vous prouver*, it is my duty (part *or* business) to prove to you, *or* I am to prove to you (with an emphasis upon *my* or *I*): *c'est à vous à parler*, it is your turn to speak, *or* now you are to speak (with an emphasis upon *your* or *you*).

*V.* The same preposition *à* serves to denote that possession or appertenance which, after a tense of *to be* in the sense of *to belong to*, causes the English possessor to be presented with 's (as if a termination) and the English *of whom* to become *whose*, when transposed: *A qui est cette maison-ci?* whose house is this? *Elle est à Monsieur Bernard*, it is Monsieur Bernard's. This 's being erroneously said to be the sign of the possessive case, see *Salmon's first Principles of the English Grammar*, where the nature of 's is traced to its origin.

*VI.* As *de*, when used instead of *depuis* and rendered in English by *from*, serves to announce *the principle of action*, or *point from which one starts*, *has started*, or *is to start*, so *à* (to) serves to announce *the end of action*, or *point whereat an action ceases*, *has ceased*, or *is to cease*: hence, *nous irons de Rochester à Douvres*, we shall go from Rochester to Dover, *V. En.*

☞ *Here it is proper to add, that if, for the principle of action, we use* depuis *instead of* de, *we should, for the end of action, use* jusqu'à (*as far as*) *instead of* à: *hence*, depuis le matin jusqu'au soir, *or* du matin au soir, *from morning to night*; de Londres à Paris, *or* depuis Londres jusqu'à Paris, *from London to Paris.*

*VII.* The French preposition *à* often disappears in making the French phrases English; for instance, when the principle of action happens to be placed after the end of action: *A trois jours de là*, three days after; *à vingt lieues d'ici*, twenty leagues off (hence *or* from this spot.) *Besides*, the English language abounds with compound words, the initial of which particularises the next; and, to form these, a transposition takes place,

whereby the preposition which would be used before the particularising noun, if to be expressed after the noun particularised, becomes suppressed: hence, *un pot à l'eau*, a water-pot; *un moulin à vent*, a wind-mill; *une chaise à bras*, an arm-chair; *une boîte à fusil*, a tinder-box; *de la sauce aux oignons*, onion-sauce; *une bouteille à l'huile*, an oil-bottle; *le marché au foin*, the hay-market; *une femme aux huîtres*, an oyster-woman, *etc. See, however*, de, *Observ. I. as also the examples of Observation I. here.* Again, *au*, *à la*, *aux*, used to alarm or call assistance, disappear in English: *au feu*, fire, *au voleur*, thief.

*VIII.* The preposition for principle of action (*de*) is often left understood; and in this circumstance instead of *from* and *to* (according to Obs. *VI*), *the English may use* about, *then* or; *or* between, *then* and: *Ils étaient neuf à dix mille*, they were about nine or ten thousand, *or*, they were between nine and ten thousand; *for*, they were from nine to ten thousand.

*IX.* Sometimes the French preposition *à* is found rendered by *a* in English, where it presents a sort of compound word: *A bord*, aboard (*for* on board); *au lit*, a-bed (*for* on bed *or* in bed).

☞ *This English particle* a *is sometimes found before a participle present*: he is gone a fishing, *il est allé pêcher*, or *il est allé à la pêche*; she is a writing, *elle est à écrire* or *elle écrit*.

Austral, e, [ôs-trâl], adj. southern, austral, austrine. *Les parties australes du Zodiaque*, the southern *or* austral parts of the Zodiack. *Terre Australe*, Terra Australis.

Autan [ô-tèn], s. m. (*vent du midi*) south-wind.

Autant [ô-tèn], adv. as much, so much, as many, so many, as. *Autant que jamais*, as much as ever. *J'ai autant de guinées que de pistoles*, I have as many guineas as pistoles. *Vous avez eu du bonheur, j'en aurai autant*, you have had good luck, I shall have as much. *Vous avez trois frères, dites-vous; j'en ai autant*, you have three brothers, you say, I have as many. *Autant de têtes, autant d'opinions*, so many men, so many minds. *Je l'ai vendu tout autant*, I sold it for so much. *Je suis autant que vous*, I am as good as you. *Autant de fois qu'on le commande*, as often as he is bidden. P. *Autant en emporte le vent*, that signifies nothing *or* that does not signify a pin. *Autant que j'en puis juger*, as far as I can conjecture. ☞ Nous avons vu que, dans les comparaisons d'égalité, le *de* se supprime pour l'Anglais avant le substantif qui s'amène avec *autant*, ainsi que le *de* qui avec *que* introduit le substantif comme dernier membre de la comparaison; *as much* est alors pour le singulier, *as many* pour le pluriel, et *as* sert à introduire le dernier membre; nous avons encore vu que le pronom *en* peut tenir lieu du substantif qui, s'il étoit exprimé, se présenteroit avec *de* dans le dernier membre de la comparaison. Ce même pronom *en* pourroit de même s'introduire dans le premier membre, s'il s'agissoit de supprimer le substantif qui autrement devroit se présenter avec *de*, à cause de l'expression de quantité *autant*; car en parlant de quelque chose au singulier, comme *d'argent*, on peut dire, *j'en ai autant que lui*, ou *qu'il en a*, I have as much as he, *or* as he has, et en parlant d'objets au pluriel, comme *d'amis*, on peut dire de même, *j'en ai autant que lui* ou *qu'il en a*, I have as many as he *or* as he has. Lorsque le mot *autant* signifie *tout cela, toute cette quantité, tout ce nombre*, ou *chacun, chacune, etc.* alors on emploie *so much* pour le singulier, et *so many* pour le pluriel; voilà pourquoi l'on dit, *je l'ai vendu autant*, I have sold it for so much; *c'eût été autant d'argent d'épargné*, it would have been so much money saved; *ce seront autant d'amis que vous acquerrez*, they will be so many friends whom you shall get; *quelques-uns ont cru que les étoiles fixes étoient autant de soleils*, some have believed that the fixed stars were so many suns; *autant en emporte le vent*, that does not signify a pin. On dit proverbialement, *autant de têtes, autant d'opinions*; so many men, so many minds. Lorsqu'un premier membre de comparaison s'introduit avec *autant que* et que le second s'introduit avec *autant*, alors *autant que* se rend ordinairement par *in as much*; tandis que *autant* se rend ordinairement par *in so much*; Ex. *Autant que Minerve est au-dessus de Mars, autant une valeur discrète et prévoyante surpasse* ou (*surpasse-t-elle*) *un courage bouillant et farouche*, in as much as Minerva is superior to Mars, in so much does discreet and provident valour surpass petulant and fierce courage. *Autant que* employé pour *selon que* se rend par *as far as*. Ex. *Autant que j'en puis juger*, as far as I can conjecture. *D'autant*, joint au verbe *boire*, se rend en Anglais par *a great deal* or *very hard*. *D'autant que, en style de pratique ou de chancellerie*, peut se rendre par *whereas, for as much as, in as much as*. Mais lorsque *d'autant* se trouve à la tête des expressions comparatives *plus, mieux, meilleur, moins, moindre, pis, pire*, on le rend par *so much the*, ou simplement par *the*, avec un comparatif Anglais, et s'il y a ensuite en Français un *que* employé pour amener la cause ou la raison de ce qui précède, on rend ce *que* par *as*, au lieu duquel *as* quelques auteurs emploient *because*; Ex. *Je l'aime d'autant plus qu'il est très-modéré*, I love him the more (*or* so much the more) as (*or* because) he is a very sober man. *On meurt d'autant plus volontiers que l'on est homme de bien*, the better a man lives the more willingly he dies. Remarquez d'ailleurs que *d'autant mieux que*, dans le sens de *par cette raison, surtout que*, peuvent se rendre par *especially as*.

Autant (*terme de palais.*) *La copie d'un acte*, duplicate of a writing.

Autel [ô-tèl], s. m. altar. *Le grand ou le maître autel*, the high *or* great altar. *Le saint Sacrement de l'autel* (*l'Eucharistie*) the holy sacrament, the Eucharist.

Autoursier, s. m. (*terme de chasse*) goshawker, one that trains up goshawks, falconer.

Autre [ ôtr ], adj. other, *En voilà un, voilà l'autre*, there is one, there is the other. *L'autre jour*, the other day. *Une autre fois*, another time. *C'est un autre Alexandre*, he is another Alexander. Quelquefois *autre* signifie *différent*; et alors on peut le rendre par *other* ou de même que l'on rendroit *different*. *Il est tout autre*, (pour *un tout autre homme*) he is quite another man, he is quite a different man. *Il ne sera jamais autre qu'il a été*, he will never be different from what he has been, he will ever be the same man. On dit, *il y en a d'uns et d'autres*, there are good and bad; *comme dit l'autre*, as the saying is, as some body says; *en voici d'un autre* ou *en voici bien d'un autre*, this is still more surprising; *il en fait bien d'autres*, he does things still more surprising or this is nothing to what he commonly does; *à d'autres*, this may do for other people but not for me, you may talk so to other people but not to me. *L'un ou l'autre*, either, the one or the other. *L'un et l'autre*, all of them, both; *l'un l'autre ou les uns les autres*, one another. *Les uns et les autres*, both, the one and the other. *Ni l'un ni l'autre*, neither.

☞ *Autres* se supprime en Anglais dans les contrastes après *nous*, *vous*, *eux*, *elles*, ex. *vous autres, jeunes gens, vous n'êtes jamais satisfaits*; you, young people, are never satisfied.

*Autre*, après *quelque*, *aucun*, *nul* et *tout*, pris indéterminément, se rend assez souvent par *else*, que l'on place non avant, mais après le nom; or comme la vraie signification du mot *else* est *dismiss* (ôtez), il ne faut l'employer que lorsqu'on veut faire sentir une exclusion à l'égard de la personne ou de la chose qui est exprimée précédemment, ou que l'on exprime immédiatement après; ou que

l'on aime mieux sous-entendre. Que s'il y a un *que* à rendre par *but* dont la vraie signification est *be out* (*soit dehors*, ce qui est l'équivalent de *ôtez*), alors on ne rend point *autre* par *else*, mais on le supprime pour éviter cette redondance vicieuse que présenteroit *else but*; ou bien on rend *autre* par *else* et l'on supprime le *que* ainsi que le pronom qu'il amène. *Donnez-moi quelqu'autre chose* (ou *donnez-moi autre chose* dans le même sens) *give me something else. Tout autre que lui eût perdu courage*, any body else would have been disheartened; (ici *he was not* est sous-entendu) *Il aime tout autre que moi*, he loves any body but me, *ou* he loves me not, he loves any body else. *Il ne fait autre chose que jouer*, he does nothing but play, (play, play, he does nothing else.)

*Autre chose*, any thing else. *Il ne fait autre chose que jouer*, he does nothing but play. *Les uns se plaisent à une chose, les autres à une autre*, some delight in one thing, some (*or* others) in another.

Autrefois [ôtr-fwâ], adv. formerly, heretofore, in former times, in times past.

Beau [bô], adj. Les anciens terminaient en *el* quantité de mots qui aujourd'hui se terminent en *eau*; l'on a cependant conservé la terminaison masculine *el* à l'égard des adjectifs, lorsque le substantif qu'ils précèdent commence par une voyelle ou une *h* muette; l'on a encore conservé *bel* pour l'ajouter comme un surnom à certains noms de baptême; enfin le féminin de ces sortes d'adjectifs se forme de la terminaison primitive *el*, en doublant la consonne *l* avant d'ajouter l'e muet au féminin. Voilà pourquoi l'on dit que *beau*, m. devient *bel*, m. avant une voyelle ou une *h* muette; *belle* pour le féminin; et que, pour le pluriel, *beau* devient constamment *beaux*, si le nom est masculin, et *belles* si le nom est féminin; voilà pourquoi l'on dit: *Un beau garçon*, a fine boy; *un bel homme*, a handsome man; *un bel air*, a fine air; *une belle femme*, a handsome woman, etc. *de beaux garçons*, fine boys; *de beaux hommes*, handsome men; *de beaux airs*, fine airs; *de belles femmes*, handsome women; *et voilà pourquoi encore l'on dit, Philippe-le-Bel*, Philip the fair. *On dit d'ailleurs: Ce que vous dites-là est bel et bon*, what you are saying is pretty good *or* well enough.

*Beau, Belle, etc.* (*agréable à la vue*) fine, handsome, comely, pretty, beautiful, neat, fair; (*agréable à l'oreille*) fine, delicate; (*en parlant du ciel et de l'air*) fine, good, fair; (*agréable et excellent*) fine, handsome, neat, delicate, curious, pleasant, excellent, good; (*bon, heureux, favorable*) fair, good, lucky, happy, favourable; (*honnête, bienséant*) fine, handsome, decent, seemly. *Cela n'est pas du beau style*, that is not elegant. *Faire beau, semblant à quelqu'un*, to keep *or* carry it fair with one. *Il l'a trahi sous un beau semblant d'amitié*, he has betrayed him under the pretence of friendship. * *Le beau monde*, (*les gens polis*) the beau monde, fine people, gentlemen and ladies. *Le beau sexe*, the fair sex, ladies, women, the fair. *Jouer beau* ou *grand jeu*, to play deep *or* high. *Un beau mangeur*, a great eater, a high feeder. *Beau joueur*, one that plays fair and never frets at play. *Avoir les armes belles*, to fence well. *Donner beau jeu à*, to give fair play to. *Payer à beaux deniers comptans*, to pay ready money. *Beau* (se prend ironiquement pour le contraire de ce qu'il signifie, et il en est de même de *fine*, etc. en Anglais.) *Voilà qui est beau, vous lever à midi!* you are a fine man indeed, to rise at twelve o'clock! *Voilà une belle équipée!* that is a fine plot indeed. *Il lui arracha l'oreille à belles dents*, he bit his ear off cleverly! *Il l'a échappé belle*, he escaped it very narrowly. *Recommencer de plus belle*, to begin a-fresh *or* more earnestly than before. *La bailler* ou *donner belle à quel-*

*qu'un*, to bamboozle *or* banter one. *La manquer belle*, to have a narrow escape. *Beau-père*, father-in-law. *Belle-mère*, mother-in-law. *Beau-fils*, son-in-law. *Belle-fille*, daughter-in-law. *Beau-frère*, brother-in-law. *Belle-sœur*, sister-in-law.

Beau, s. m. excellence, beauty, *etc.* *Joindre ensemble le beau et l'effroyable*, to join together the fair and the foul. *Le beau des images est de représenter la chose comme elle s'est passée*, the excellency of images is to make true representations of things. *Il fait beau* (*il fait beau temps*) it is fine weather. *Il fait beau se promener*, it is fine walking *or* agreeable to walk. *Il fait beau voir ce général à la tête de ses troupes*, it gives one pleasure to see that general at the head of his troops. *C'est une cérémonie qu'il fera beau voir*, it is a ceremony which it will be agreeable to see. *See the 5th obs. on* falloir. *Tout beau!* interj. hold, hold there, fair and softly, not so fast! *Tout beau! ne parlez pas si haut*, softly! do not speak so loud. *Tout beau! ne vous fâchez pas*, peace, peace! be not angry.

Un temps de l'expression *Avoir beau*, placé avant l'infinitif d'un verbe, forme en Français un idiotisme dont il est à propos de bien définir la force; pour bien employer un temps personnel d'*avoir beau*, il faut lui donner pour nominatif la personne ou la chose qui seroit naturellement le nominatif du verbe employé à l'infinitif, si ce verbe se rendoit par un temps personnel; ce que l'on peut découvrir en changeant le temps d'*avoir beau* en l'expression adverbiale *en vain* (ou quelque équivalent) avec l'addition de quelque chose, si le sens n'est pas complet. Au reste, ces temps d'*avoir beau* forment chacun un tour de phrase qui a une force superlative, soit à l'égard de la qualité de la personne ou de la chose, soit à l'égard de la fréquente répétition d'une action ou d'être dans une certaine situation; laquelle force superlative ne laisse pas d'être inutile, parce que certaines circonstances la rendent nulle; circonstances ou que l'on sous-entend, ou que l'on exprime ensuite de manière que l'auditeur ou le lecteur s'apercoive sur-le-champ que la conclusion ou l'inférence est différente de ce à quoi il devoit naturellement s'attendre d'après la force superlative annoncée antérieurement. *Vous avez beau chasser le chagrin, il revient toujours*; drive away sorrow ever so much, it will return; you may drive away sorrow as much as it is in your power, still it will return; in vain you repeatedly drive away sorrow, it will return, *etc.* *J'ai beau l'attendre, il ne viendra pas*; it is useless for me to wait for him, he will not come! *Elle a beau faire, elle n'en viendra pas à bout*, let her do what she can, she will not succeed *or* bring it about. *Vous avez beau dire et beau faire, il réussira dans son entreprise*, whatever you may say and do, he will succeed in his enterprise; you may (*let you*) say and do whatever you please, he will succeed in his enterprise. *Mes affaires auroient eu beau être pressantes* (*quelque pressantes qu'eussent été mes affaires*) *je n'aurois pas laissé de vous écrire*, how pressing soever my affairs had been, I would have written to you. Si *chez mon père* se rend par *at* ou *to my father's house*, cela est égal à *at* ou *to the house of my father*, puisque *'s* signifie *the*,

lorsqu'il y a transposition. Donc il n'y a rien de sous-entendu dans *at* ou *to my father's house*. Mais lorsque *chez mon père* se rend simplement par *at* ou *to my father's* (ce qui arrive souvent), alors il est clair que *house* ou *apartment* est sous-entendu. Il en est de même à l'égard de *de chez*; car *de chez mon père* peut se rendre *et* par *from my father's house* ou *apartment*, et simplement par *from my father's*. *N. S.*

De [dê], prép. of, from, off, out of, in, among, on, upon, by, for, about, with, at, to, through, *etc.* In order to be able to determine positively which of the preceding English prepositions should be used in preference, one ought to consider what sense *de* is used in, and to know the real value of each English preposition. However as there is no word in the French language, that puzzles more an English person than this word *de*, it is my duty to throw some light on the use of it, and to furnish the student with that clue which may lead him out of a labyrinth hitherto very intricate.

*1.* When two nouns come together, one of which serves to particularize the other, the particularizing one will generally come in French with *de* and in English with *of*, ex. *Le royaume d'Angleterre*, the kingdom of England. *Un prince du sang*, a prince of the blood. *Un homme de mérite*, a man of merit. Now as the particularizing noun is the equivalent of an adjective, it often happens that the English change the French particularizning noun into an adjective, ex. *Une femme de vertu*, a virtuous woman. *Un homme de bien*, a good man, a worthy man. *Un carrosse de louage*, a hired coach, *etc.*

The English, for the sake of dispatch, often place the particularizing noun before the particularized one, which construction enables them to suppres the preposition (*or* an equivalent) which otherwise must be expressed. That construction can take place especially when the particularizing noun denotes *matter, use, quality*, etc. ex. *Une montre d'or*, a gold watch. *Une mine d'argent*, a silver mine. *Une chandelle de cire*, a wax candle, *etc.* Observe, *that* A bottle of wine, *is in*

*French*, une bouteille de vin; *but* A wine bottle *is* une bouteille à vin : — the first English construction explains *that quantity of wine which a bottle contains*, the second explains *that sort of bottle which is fit to put wine in*. See also *A*, *Observ. VII.*

The French *de*, placed between two substantives, say Grammarians and Lexicographers, commonly causes in English the second to be in the possessive case; as in *la maison de mon père*, my father's house ; *le fils d'Alexandre*, Alexander's son ; *le livre de Pierre*, Peter's book : but they ought to have warned the student that such a construction can take place only when the second French noun is actually the owner *or* possessor of what the first noun means: for the construction now alluded to could not be used in the circumstances which have been noticed before; and besides, that pretended possessive case, traced to its origin, is not what is commonly supposed. See *Salmon's first Principles of English Grammar.*

*II.* It is easy for an English person to render *from* by *de*, with pretty good accuracy when he is aware of those circumstances which have been noticed at *A*, Obs. *I.* These precluding the use of *de*; but it is not easy for a French person to know when his *de* should be rendered by *from*. The French *de* can be rendered by *from*, only to announce the point from which a *movement* or *change* begins with an accessary idea of separation. See *A*, Obs. *VI. VIII.* Hence it is that after those expressions which denote *privation*, *reception*, *extraction*, *separation*, *exemption*, *deliverance*, *derivation*, *emission*, *abstinence*, *deviation*, *wandering*, *distance*, *birth*, *origin*, *hinderance*, *dissuasion*, *banishment*, or any equivalent, we generally find *from* (sometimes *out of*) in English (and *de* in French) with regard to the thing whence the separation arose, ex. *J'ai reçu ce matin une lettre de notre ancien ami*, I received this morning a letter from our old friend ; *in*, *la réception de cette lettre m'a fait un plaisir infini*, as *de* denotes no separation, as *de cette lettre* would become *cette lettre* in the accusative, if the verbe *recevoir* were used *instead of its verbal noun reception* (for, we might say, *j'ai reçu cette lettre et elle m'a fait un plaisir infini*) so, it must be rendered by *of*; and this distinction points out one grand principle, namely, *A verbal noun arising from an active verb is to govern with* de (*of*) *whatever would be the accusative of the active verb.* As *from* is sometimes to be rendered by *dès*, see *dès*; and as it is sometimes rendered by *depuis*. See *A*, Obs. *VI.*

*III.* The French *de* is used for the English *at* to announce on whom falls *raillery*, *mockery*, *murmuring* or *any other affection of the soul*, such as *astonishment*, etc. or to announce what occasions *raillery*, *etc.* and consequently it may present itself at the head of the *cause* which makes one *blush*, *repent*, *rejoice*, *smile*, etc. Il se moque de son père, *he laughs at his father. Pourquoi riez-vous de ce que je dis?* why do you laugh at what I say? As *de ce que* means sometimes *because*, see the next *observation.*

IV. The French *de* is used to announce also that *cause* which in English comes with *for* (the real meaning of which *for* is elliptically *cause*) or with *from* (the meaning of which is then elliptically *original cause*), or with *with* (the meaning of which is then *be*, *let it be*, with *cause* understood; that is to say, the full meaning of which is then *and the cause of this is, was* or *will be*). Hence it is that the French say, *il mourra de chagrin*, he will die for sorrow, with sorrow, when the English say, *he will die for sorrow*, they give to *of* the meaning of *consequence* elliptically for *as the consequence of*; that is to say, *he will die of sorrow* is equal to this, *he will die, and this (his death) will be the consequence of sorrow.* Hence it is that as expressions which denote some affection of the soul generally have *de* after them to introduce the cause of the affection, we often find *de ce que* when the cause is to be brought in with a verb, though generally introduced, in English, with *that*, elliptically equal to *for this*, *that*; or *because*; or *the cause is this*, *that. Je suis surpris de ce que vous êtes venu*, I am surprised at your being come, I am surprised that you are come, I am surprised because you are come.

*V.* The *de* which is generally used, after a passive expression, before what would be the agent of the verb if used actively, is in English generally *by*, sometimes *of* (but *by* is always right). Now as the English *by* is most times rendered into French by *par*, it is proper to observe here that *de* may be used when no part of the body is necessarily to move, or when, after verbs, which suppose a motion of the body,

this motion has only produced a passive condition or situation : hence *par* after a passive verb should hardly be used in French, except before an active agent, I mean before an agent, that has some design or particular views in what is done by him, ex. *Il est estimé de tout le monde*, he is esteemed by every body (instead of *tout le monde l'estime*, every body esteems him). *Elle étoit entourée de gens incommodes*, she was surrounded by troublesome people. Now *elle étoit entourée par des gens incommodes*, would be rendered by common translators in this same manner, *she was surrounded by troublesome people*, whereas the true translation ought to be, *she was surrounded by designing troublesome people*, or something equivalent to it However when the passive verb, besides its natural government, is to be followed by *de*, we must use *par* before the agent, ex. *Your work has been praised in a very delicate manner by a great academician*, votre ouvrage a été loué d'une manière fort délicate par un grand académicien.

*VI.* The French *du*, m. *de la* f. (or *de l'* before a vowel *or* h mute) and *des* plural, all of which generally become *de* when an adjective is to be placed before a noun taken in a partitive sense, may be rendered into English by *some* (or *any*, according to circumstances), when only a small portion or a small number is meant, especially with an emphasis : but when there is no emphasis to be laid upon the portion or number whether small or great, those partitive articles may be suppressed in English. Hence it is that we find *il a du vin*, expressed by *he has some wine*, and simply by *he has wine* ; and *il a de bon vin* by *he has some good wine*, and simply by *he has good wine*.

Whenever a noun used in the partitive sense is affected by an expression which of itself requires *de* before what it falls upon, then, for the sake of euphony, the English *some* (or its equivalent *any*) without emphasis may be suppressed, and *de* alone be used ; but as *some* (or *any*) with emphasis *may be rendered by* quelque, quelques, un peu, un peu de, etc. so *of some* (*of any*) etc. with emphasis, *may be* de quelque, de quelques, d'un peu, d'un peu de. Hence it is that the French say : *il nous donna du vin*, for *he gave us wine* or *he gave us some wine*, without emphasis as to the small quantity ; and *il nous a donné un peu de vin*, for *he gave us some wine* in the sense of *he gave us a little wine* ; *il nous a donné un verre de vin*, for *he gave us a glass of wine* (wherein the quantity is determined by *verre*, glass) ; *il nous a montré du vin*, for *he showed us wine* or *some wine* ; *il nous a parlé de vin*, for *he spoke to us of wine* in the sense *of he spoke to us of some wine* or *he spoke to us of wine* (indeterminately as to the quantity or sort).

After some English expressions of quantity or number susceptible of being used adjectively, the French participle *de* is suppressed, when the things or persons spoken of are to be introduced in an indefinite sense, but if the things or persons spoken of have a definite signification, the French particle *de* cannot be suppressed. Hence, *il a beaucoup d'esprit*, he has much wit ; *il a beaucoup de l'esprit dont vous parlez*, he has much of the wit of which you speak ; *il a beaucoup d'amis*, he has many friends ; *il a beaucoup des amis qui vous manquent*, he has many of those friends whom you have not.

*VII.* The French *de* may be commonly used to express *in* before any word which implies *manner*. Hence, *de la manière dont il se comporte*, in the manner in which he behaves ; *osez-vous me parler de cette manière*, ou *de la sorte?* dare you speak to me in that (*or* this) manner? *De* is often expressed by *in* when it comes in the sense of *dans*, *pendant*, *durant*. Hence, *de notre temps*, in our time ; *de jour*, in the day-time ; *de grand matin*, early in the morning. In speaking of dimensions, as in *trois pieds de long* ou *trois pieds de longueur*, if the adjective of dimension be used in English, *de* disappears ; if the noun of dimension be used, *de* is rendered by *in* ; hence the English, *three feet long* or *three feet in length*. After a superlative expression *de* in the sense of *dans* is generally to be *in* ; in the sense of *d'entre*, it may be *among* or *of*, ex. Elle est la plus belle femme de la province, *she is the handsomest woman in the country* ; elle est la plus belle des femmes que je connoisse, *she is the handsomest of* or *among the women I know*. We find that *de* may stand for *on* in speaking of *sides*, as in *de mon côté*, on my side *or* on my part ; *de part et d'autre* or *des deux côtés*, on both sides ; *du côté de l'orient*, on the east, *or* the east side, on the east parts, *etc.* We find also that *de* is generally used for the English *on* before an instru-

ment of music, when the verb *jouer* (*to play*) or some equivalent, comes along with it; as in *jouer de la harpe*, *du violon*, etc. to play on the harp, on the violin, *etc.*

*VIII.* Sometimes *de* is not expressed in English. Some circumstances have already been made obvious, not only in the preceding observations on *de*, but also in the 8th observation on *en* which see: the following may guide the student in regard to those phrases which may be similar to them. *De*, before an adjective belonging to a number of individuals expressed just before, may stand for *qui est*, *qui soit*, etc. and then it is often found suppressed in English though it might be rendered by *who* or *which is*, etc. *Dans ce combat il y eut* 3000 *hommes de tués* (*qui furent tués*), in that action there were 3000 men killed. In *ce sot d'officier*, and similar phrases, if the noun be made an English adjective, *de* will disappear; if the noun be expressed by an English noun, *de* will be rendered by *of a* or *of an* for the singular, and *of* for the plural: hence, *that foolish officer* and *that fool of an officer*. The reason is now obvious why *mon coquin de valet* may be *my rascally servant*. In *il n'a mangé de tout le jour*, *il ne reviendra de dix ans*, etc. *de* may disappear or be rendered by *for*, hence *he has eaten nothing for this day* or *he has eaten nothing for this whole day*, and *he will not come back these ten years* or *he will not come back for these ten years*. Sometimes *de* is prefixed to a noun without an adjective, after a tense of *être*, because this noun is somewhat equal to an adjective, as in *il est de votre intérêt de lui plaire* (*il est intéressant pour vous de lui plaire*), it is your interest to please him. Sometimes a noun which has *de* thus prefixed is attended with an adjective, and then both are somewhat equal to an adjective affected by an adverb: *c'est de la dernière folie*, it is the greatest folly, *equal to*, it is extremely foolish. Now I shall point out when *de* is to be used *with an infinitive*.

*IX.* *De* is to be used before an infinitive in several circumstances which I shall comprise in three articles; and in the fourth I shall mention those verbs which may be followed by an infinitive without *de*, contrary to the general rule.

1st. Whenever an infinitive is introduced instead of a noun of things which ought to take *de* before it on account of the preceding expression, this infinitive should also take *de*. Hence an infinitive governed by a preceding expression is generally to have *de*, not only when the preceding expression requires *of* in English before the thing it may fall upon, but in those circumstances (wherein it is to be introduced instead of a noun) which I have noticed in Obs. 2, 3, 4; ex. *I have had the honour of speaking to him*, j'ai eu l'honneur de lui parler; *we forewarn you to take your measures*, nous vous avertissons de prendre vos mesures; *I do not hinder him from coming here*, je ne l'empêche pas de venir ici; *I laugh at seeing him run in that manner*, je ris de le voir courir de cette manière (the seeing of him run in that manner is the cause of my laughing) *I am glad to find you here*, je suis bien aise de vous trouver ici (the finding of you here is the cause of my being glad.)

2*dly*. Whenever an infinitive is made to stand where a noun of things governed in the accusative should stand, that infinitive is generally to have *de* before it, though the noun ought not to take *de*, since the accusative of a thing or person is to present itself without any preposition. Hence, though we say, *to forget a thing*, *oublier une chose*, yet *I have forgotten to bring my books*, should be rendered by *j'ai oublié d'apporter mes livres* (*I have forgotten* what? to bring my books *is the answer*, therefore *to bring my books* stands here for *the thing which I have forgotten*, that is to say *to bring my books* stands instead of *the accusative* of *I have forgotten*). Here I must observe that a few verbs which govern the accusative of the thing, will however require *à* before the infinitive which they are made to govern in order to express a *tendency towards doing* or *acquiring*, etc. what the infinitive means: and though we say, *aimer une chose*, *apprendre une chose*, *montrer une chose*, *étudier une chose*, *chercher une chose*, etc. we must say, *aimer à faire*, *apprendre à faire*, *montrer à faire*, *s'étudier à faire*, *chercher à faire*, etc. See also hereafter, at 4*thly*.

3*dly*. Whenever an infinitive, which ought naturally to be the nominative of another verb, is placed after this other verb, because *il* or *ce* has been given to it as a borrowed nominative; it seems that this infinitive, thrust out of its place, is introduced as a sort of accusative case; and therefore it should take *de* according to what has been observed at the article 2*dly*. And yet if the same infini-

tive were actually used as the nominative of the other verb, it ought to present itself without any preposition. *Hence it is that*, it is useless to speak to me about it, *is in French*, il est inutile de m'en parler; *instead of* m'en parler est inutile, *the equivalent of* to speak to me about it is useless. *The first construction is that which suits best the French genius, which likes to make every thing appear in a sort of accusative form.* See *A*, Obs. *II.*

4*thly*. Certain French verbs which govern the thing in the accusative, will have the infinitive they govern (instead of that accusative) present itself barely without any preposition: such are, *affirmer, aimer mieux, aller, assurer, avouer, compter, confesser, croire, daigner, déclarer, déposer, désirer, devoir, dire, entendre, envoyer, faire, falloir, s'imaginer, laisser, mener, nier, oser, ouïr, paroître, pouvoir, prétendre, publier, rapporter, reconnoître, savoir, sembler, souhaiter, soutenir, valoir mieux, venir, voir*: il affirme l'avoir vu, *he affirms to have seen it* or *he affirms that he has seen it*, etc. Some of these will however be sometimes followed by *de* and an infinitive, as *désirer, venir, souhaiter, dire*, etc. *Il désire* ou *souhaite de vous voir*, he wishes to see you. *Dites-leur de venir*, bid them come. *Je viens de lui parler*, I have just spoken to him. *Il ne fait que d'arriver*, he is but just arrived. *N. En [é*n*], is sometimes a *preposition* and sometimes a *pronoun*. When a preposition, it chiefly means *in*, *into*, *to*, etc. When a pronoun, it chiefly means *of him*, *of her*, *of it*, *of them*, *from him*, etc. As the proper use of the word *en* has been but indifferently pointed out, the following observations will be of service to the student. The pronoun *en* shall be explained in the last.

*I.* To express those progressive successions which in English are presented with *from* and then *to*, we are to use *en* for *to*, provided we repeat the word; but *à* if *autre* is to be introduced instead of repeating the word. Hence, *de temps en temps* or *de temps à autre* or *d'un temps à l'autre*, from time to time. *De ville en ville* or *d'une ville à l'autre*, from town to town. *De deux en deux jours*, every other day.

*II.* In speaking of time, *en* denotes that length of time which the doing of a thing will take up, and *dans* expresses the time after the expiration of which the thing is to begin *or* to take place. *Il va à Windsor en deux heures*, he is two hours going to Windsor. *Il va à Windsor dans deux heures*, two hours hence he is to go to Windsor. *Many a good writer is not sufficiently aware of this distinction.*

*En* is also used for *pendant* when we speak in an indeterminate sense. *En hiver*, in winter *or* in winter time, *etc. In the spring* may however be *au printemps* or *dans le printemps*; and *in the beginning of* may be either *au commencement de* or *dans le commencement de.*

*III.* With respect to countries and provinces introduced barely each with its name, *en* will do if we speak indeterminately of *somewhere in* or *into*; but *dans* should be used if we mean *the whole*, as well as if the word be determined and particularized by some other word. *Être en France*, to be in France. *Aller en France*, to go into France *or* to go to France. Au lieu de *en Angleterre*, on dit quelquefois *dans la Grande-Bretagne*, pour exprimer *in* ou *into* dans le sens de *within*.

When the name of a *country* or *island* proves to be one of those which have been discovered by Christopher Columbus, and other adventurers, we generally use *au*, *à la*, *aux*, instead of *en*, as we use *du*, *de la*, *des*, instead of *de*. *He has been in Mexico and Jamaica*, il a été au Mexique et à la Jamaïque.

*IV.* As to a *city*, *town*, *village*, *etc. à*, is used instead of *en* if we speak indeterminately of *living in* or *being in some part of it*; but *dans* if we mean *the whole* or wish to represent the place as containing. *Il demeure à Paris*, he lives at *or* in Paris. *Il y a plus d'un million d'âmes dans Paris*, there are above a million of people in Paris. *Mon père est en ville*, means *my father is not at home* (*but gone somewhere in town*); whereas. *Mon père est à la ville*, means *my father is in town* (*not in the country*). We say *en haut* above;

*en bas*, below, down ; *en dedans*, within side ; *en dehors*, without side, *etc.* ; *d'en haut*, of or from above, *etc.*

*V.* After an expression which denotes change, *en* (into) is to be used instead of *dans*, even though the noun should be made defined. *Elle fut métamorphosée en la rivière que vous voyez couler*, she was metamorphosed into the river which you see flow along.

After any verb which means *to consist*, we use *en* with the nouns taken indeterminately, *dans* before nouns properly defined, and *à* before infinitives ; whether the preposition be in English *in* or *of*.

*VI. En* or *dans* are almost indifferently used before *tout*, *pronouns*, *adjectives of number*, (followed by any noun not of time), *indefinite articles*, *demonstrative* and *possessive adjectives* ; yet when we speak of a place whereunto we put something *dans* is better. *Mettez cet argent dans votre poche*, put this money into your pocket. We say *en mon particulier*, for my part. *En tout*, in all, *etc.*

*VII.* In most other circumstances, *en*, denoting an indeterminate sense, is proper when the noun is not particularized or has not been so ; and *dans* must be used to denote that the noun to which it is prefixed is employed in a precise and determinate sense or represented as something which contains. *Il est en prison*, he is in jail *or* in a jail (which jail he is in is matter of indifference or left out of the question). *Il est dans la prison*, would imply that the kind of jail is sufficiently known. Hence *He is in Clerkenwell jail*, il est dans la prison de Clerkenwell.

We say. *En vertu de* for *by virtue of* ; and *en robe de chambre*, etc. for *in a night gown*, etc.

*En* is often equal to *like*, *like a*, *like an*, *after the manner of*, etc. ; hence *agir en roi*, to act like a king. *Ils se comportent en gens d'esprit*, they behave like people of sense.

*VIII. En* is the only French preposition which can be used before a participle present (it is even suppressed when the participle present is compound), to express, *in*, *by*, *with*, *on*, *upon*, etc. and even *while he*, etc. *when he*, etc., *as he*, etc. This preposition serves then to form a detached or incidental phrase, that is to say, to express interjectively or explanatorily the circumstances of an action, *etc.* pointing out either the time when it happened or the manner in which it took place or the means used to make it happen. *L'homme vertueux ne cesse de faire du bien qu'en mourant*, a virtuous man leaves off doing good only when he dies. *Parlez-lui en passant*, speak to him as you go by ; (*en passant* is also used to express *by the by*). *Il me dit en partant, que*, etc. he told me, as he set out, that, etc. *On a guéri un prince de cette maladie en lui faisant prendre tous les jours deux cuillerées de vin d'Espagne*, a prince was cured of that disorder by making him drink every day two spoonfuls of Spanish wine.

*N. B. En* prefixed to a participle present may generally serve to express those actions which are introduced in the sense of *at the same time that I*, (*thou*, *he*, *she*, *it*, *we*, *you*, *they*), or of *and mean while*, *I*, etc. *Blanford enriched himself in doing his duty* (*while he did*, *at the same time that he did*, *and at the same time he did*, *his duty*) Blandford s'enrichit en faisant son devoir.

*IX.* The pronoun *en* is the representative of any noun which (if expressed instead of *en*) would have *de* prefixed to it, or some other word equivalent to *de*, as *touchant*, etc. and here it is proper to refer the student to the observations made on *de*. He will then understand that *en* may mean not only *of him*, *of her*, *of it*, *of them*, *of the action*, etc. *from him*, *from her*, *from it*, *from them*, *thence*, *hence*, *from the action*, etc. *of* or *from me*, *of* or *from thee*, *of* or *from us*, *of* or *from you* ; but also speaking of instruments not musical *with it*, *with them*, of musical instruments *on it*, *on them* ; and to express the cause *at it*, *at them*, *at the action*, etc. *for it*, *for them*, *for the action*, etc. and even *at me*, etc. He will be able to understand that *en* with a passive expression may stand for *by him*, *by her*, *by it*, *by them*, and even by *me*, etc. and that with regard to quantity or number, it may be for *some* or *any* to denote an indeterminate portion of what has already been mentioned ; and in this place I shall observe that *en* may serve to avoid repeating a noun (which indeed is often left understood in English) after a numeral adjective ; as in *N'a-t-il pas quatre frères ? Il en avoit quatre, mais il n'en a plus que deux*, has he not four brothers ? he had four (*brothers is understood*) ; but he has now only two (*still*, *brothers is understood*).

Sometimes *en* is an energetic pronoun, the force of which seems to be lost in English, for instance in the comparative phrases as this *Il en est*

*héros comme des autres hommes*, it is with heroes as with other men. *En vouloir à quelqu'un*, to have a grudge against one, owe one a spite. *J'en suis là*, that is my case, that is my temper, *as well as* I left off there. *J'en tiens*, I am caught. N. S.

FAINÉANT, E [fé-nâ-*ên*, *ênt*], adj. et s. idle, lazy, slothful, sluggish, lazybones.

FAINÉANTER [fé-nâ-*ên*-tâ], v. n. to be idle, loiter, sit still, do nothing.

FAINÉANTISE [fé-nâ-*ên*-tiz], s. f. idleness, laziness, sloth, slothfulness, sluggishness.

FAIRE [fêr], v. a. (*former, fabriquer, composer*) to do *or* make, (*causer*) to make, cause *or* be the occasion of, (*dire, commander*) to bid, command *or* order, (*observer*) to do, observe *or* obey, (*accoutumer, façonner*) to fashion, use, accustom, inure *or* train up; (*s'occuper à*) to do, busy, *or* employ one's self about; (*representer, imiter, contrefaire*) to personate, play, act like; (*s'ériger en*) to set up for; (*raconter, dire*) to tell, relate; (*achever*) to finish, complete; (*exercer, parlant de métier ou d'emploi*) to exercise, practise, profess; (*avoir soin, tâcher*) to see, endeavour, take care; (*publier, annoncer, dire*) to give out, publish, report; (*causer, attirer, exciter*) to bring, cause, get, raise; (*des soldats*) to make *or* raise; (*pratiquer, commettre une action*) to do, commit *or* be guilty of. *Combien faites-vous ce drap?* how much do you ask for that cloth? what will you sell it for? *Je n'en veux pas faire pour si peu*, I will not sell so little of it. *Je n'y saurois que faire*, I cannot help it. *Faire* (*être*) to be. *Cela fait tous mes délices*, that is all my delight. *Cela ne fait rien à notre propos*, that is nothing *or* signifies nothing to our purpose. *On le faisoit mort*, it was reported that he was dead. *Il tâche de vous faire quelque argent*, he endeavours to get *or* raise some money for you. *C'est à faire à moi d'y aller*, it is my business to go thither. *C'est à faire à un poltron de fuir*, it is for cowardly people to run away. *C'est bien à vous à faire?* does it become you? *cela n'y fait rien* (*n'importe*) it is no matter. *Je n'ai que faire de cela*, I have no need of that. *Avoir à faire à quelqu'un*, to have business with one, have to do with him. *J'en ai à faire* (*affaire ou besoin*) I have need of *or* occasion for it, I want it. *Qu'en avez-vous à faire?* what is that to you? *Il a à faire à moi* ou *avec moi* (*j'ai rompu avec lui*) I have done with him *or* I am out with him. *Je vais où tu n'as que faire*, I am going where thou hast no business. *Être à tout faire*, to be for any thing. *Faire* (*parlant de certaine quantité de chemin*) to go, walk, ride, *etc. J'ai déjà fait trois lieues*, I have already walked three leagues; (*rode* feroit entendre *à cheval* ou *en voiture*). Pour marquer un changement de condition, *etc.* avec *faire*, le nom primitif prend quelquefois *de*, et le second devient l'accusatif de *faire*. Ex. *faire d'un prêtre un général*, to turn a priest into a general. *Faire d'une mouche un éléphant*, to turn a fly into an elephant, *that is to say*, to make a fly appear like an elephant. *Faire* avant un infinitif se supprime quelquefois en anglais. *Il fait bâtir une maison superbe*, he builds *or* is building a most elegant house, *ce qui est l'équivalent de* he causes a most elegant house to be built. Dans les autres circonstances *faire* avant un infinitif peut se rendre par *to cause*, changeant l'infinitif suivant qui paroît actif en un infinitif passif (si le verbe peut réellement être actif, car un verbe neutre ne pourroit devenir passif) et plaçant après *to cause* ce qui paroît être l'accusatif de l'infinitif; ou bien, *faire* peut se rendre par *to make*, qui n'exige pas que l'infinitif suivant devienne passif. *Faire chanter quelqu'un*, to make one sing. *Faire chanter une hymne à quelqu'un*, to make one sing a hymn, to cause a hymn to be sung by one. *V. A.* Obs. 1, et *Réfléchi*. On dit d'ailleurs *faire faire*, to bespeak, get made, cause to be made. *Faire savoir*, to let know, send word of, give an account of, give to understand. *Faire dire*, to send word of, cause to be told. *Faire venir*, to call *or* send for, bring, cause to come. *Faire entrer*, to call in, let in, introduce, drive into. *Faire sortir*, to call out, drive out, take out. *Faire sortir par force*, to force *or* drive out. *Faire prêter serment à quelqu'un*, to tender the oath to one, put one to his oath. *Faire voir*, to show, cause to be seen. *Faire obéir*,

to cause to be observed. *Ne faire que* avant un infinitif signifie *to do nothing but* : et *ne faire que de* signifie alors *to have but just* or *to be but just*. Ex. *Elle ne fait que rire*, she does nothing but laugh. *Il ne fait que de sortir*, he is but just gone out. *Il ne fait que de commencer*, he has but just begun. *N. S.*

*Faire*, v. n (*être convenable*) to look, fit; (*faire les cartes*) to deal. En parlant de la température de l'air, de son effet sur nous ou sur les chemins, les rues, le pavé, *etc.* les Français emploient souvent *il fait*, *il faisoit*, etc. Voilà pourquoi l'on entend dire : *Il fait mauvais* ou *mauvais temps* (*le temps est mauvais*) it is bad weather. *Il fait crotté* (*les rues sont crottées*) it is dirty. *Il fait propre dans les rues* (*les rues sont propres*) the streets are clean. *Il fait chaud* (*l'air est chaud*) it is warm weather. *Il fait jour* (*il est jour*) it is day-light. *Il se fait jour*, it draws towards day-light; day-light comes on. *Il fait nuit* (*il est nuit*) it is night. *Il se fait nuit*, it draws towards night, night comes on. *Il fait noir*, ou *obscur*, *sombre* ou *triste*, it is dark or gloomy weather. *Il fait brouillard*, it is foggy weather. *Il fait clair de lune* (*la lune luit*) the moon shines. *Il fait du tonnerre* (*il tonne*) it thunders. *Il fait des éclairs* (*il éclaire*) it lightens. *Il fait du vent* (*il vente*) the wind blows. *Il fait des horribles tempêtes sur ces côtes-là*, there are dreadful storms upon those coasts. *Fait-il jour chez M. A.* ? is Mr. A up? *Il ne fait pas encore jour chez Madame B*, Mrs. B. is not yet up or to be seen. En parlant de la nature, condition ou disposition, ainsi que des qualités de certains endroits à l'égard de la cherté des denrées ou de la sûreté des individus, les Français se servent quelquefois de *il fait*, *il faisoit*, etc. Ex. *Il fait cher vivre dans cet endroit*, *d'ailleurs il n'y fait pas sûr* — *Ne fait-il pas meilleur en Hollande?* — *Il y fait bon*, *mais pas si bon qu'ici*, it is dear living in that place; besides, one is not safe there. — Is not Holland better? — It is a good country, but not so good as this part of the world. *Il faisoit chaud dans ce combat*, that was a warm fight. C'est par la même raison que l'on dit, *il fait dangereux de se jouer de son maître*, it is dangerous to meddle with one's master, *etc.* *Faire*, employé au lieu de la répétition d'un verbe, se rend par *to do*, ou par *to be*, *etc.* selon la manière dont le premier verbe s'est introduit. *Il étudie mieux qu'il ne faisoit*, he studies better than he did or used to do. *Il fait plus froid qu'il ne faisoit hier*, it is colder than it was yesterday or than yesterday; car on peut supprimer *faire* relatif *lorsque quelque circonstance annonce suffisamment un temps antérieur ou à venir*. *Se faire*, v. r. to be doing, be making, be growing, be improving, be getting, *etc.* *also* to be used, to be done, *etc.*; (*devenir*) to become, turn; (*s'accoutumer*) to grow used or accustomed, make one's self used or accustomed, inure one's self. *Se faire des amis*, to get friends. *Se faire des affaires*, to bring one's self into trouble. *Se faire les ongles*, to pare one's nails. *Se faire voir*, to show one's self. *Se faire sentir*, to work upon; make an impression upon, touch; *also* to be felt and to make to smart. *Pouvoir se faire*, to be possible. *Il peut se faire que*, it is possible that. *Se peut-il faire?* is it possible? *Je m'en suis fait pour deux guinées*, I got myself in for two guineas, or it cost me two guineas. Dans *se faire faire* on peut exprimer *se faire* par *to get*, rendant l'autre *faire* passif; par exemple, comme *faire la barbe* est *to shave*, et *se faire la barbe* est *to shave one's self*, donc *se faire faire la barbe* peut se rendre par *to get one's self shaved*.

*Faire*, Mar. *le nord*, *le sud*, *l'est* ou *l'ouest*, to make northing, southing, easting or westing. *Faire pavillon blanc*, to put out a white flag. *Faire voile sur un vaisseau*, to run down upon a ship, bear upon a ship. *Faire du bois*, to take in a provision of wood. *Le courant fait sept nœuds par heure*, the tide runs seven knots an hour. *Le jusant se fait*, the ebb is making. *La brise de terre se fait*, the land-breeze is springing up. *La brise du large se fait*, the sea-breeze is coming in. *Ce vent s'est fait depuis le lever du soleil*, this wind has got up since sun-rise.

‖ Fallacieu-x, se [fâl-lâ-siêu, siêuz], adj. fallacious, captious.

Falloir [fâ-lwâr], v. n. to be requisite *or* necessary *or* needful *or* wanting. This verb can be used only with the borrowed nominative *il*, which so often proves that the French language has an antipathy to whatever is either neuter or passive. Now *il faut*, *il falloit*, *il fallut*, *il faudra*, etc. are proper to express what we are obliged to do, be *or* have, through complaisance *or* custom, *as well as* what personal interest bids us do, be *or* have, *and* what we should be right in doing, *as also* what, from circumstances, we conjecture must be *or* take place. See the observations hereafter. *Comme il faut*, as should be, as it ought to be, as you ought, *etc. and sometimes* soundly, handsomely. *Vous faites ce qu'il faut*, you do what should be done, you do what is right. *Combien vous faut-il* (ou *que vous faut-il*) *pour cela*? what must you have (what do you ask) for that? *Il ne faut que cela pour* ou *il ne faut pas davantage pour*, that is enough (*or* sufficient, *etc.*) for. *Plus qu'il ne faut*, more than is required (sufficient, needful, wanting, *etc.*) *C'est un faire le faut*, there is an absolute necessity for it, that is a forced put. *Si faut-il que*, yet it is necessary that. *Combien s'en faut-il*? how much is wanting? what is the deficiency? *Il s'en faut de trois pouces*, there are three inches wanting; *ou peu s'en faut*, or very near the matter. *See Obs. VI*; *see also* Faillir. Now the editor presumes that the following observations will prove useful.

I. In speaking indeterminately as to the person or persons who, and even thing or things which, must do or be or have, *il faut*, *il falloit*, *il failut*, etc. may be used before the thing wanted (without any verb to express *have*) as well as before an infinitive. *One* (*people*) *must have money to go to law*, il faut de l'argent pour plaider. *Money must be had to carry on this war*, il faut de l'argent pour continuer cette guerre. *One* (*people*) *must study in order to learn a language*, il faut étudier pour apprendre une langue. See the following observations.

II. When, wishing to speak in a particular and determined sense, we choose to name or point out the person or persons who, or the thing or things which, must do or be or have; then, we may use *il faut*, *il falloit*, etc. before that thing wanted (without any verb to express *have*) observing that the person or persons *etc* should then be considered as affected by *to* (*à*) : but if a verb is to be expressed to point out what is wanted, we should use *il faut que*, *il falloit que*, etc. making the nominative of *must* become the nominative of the other verb to be in the subjunctive; hence it is obvious that any sentence which conveys an idea of something wanted should be so turned as to introduce *must*. *Your brother wants* (or *must have*) *a horse*, il faut un cheval à votre frère; *he must also have a saddle*, il lui faut aussi une selle. *The garden must have more width*, il faut plus de largeur au jardin. *She must write a letter to them*, il faut qu'elle leur écrive une lettre. *The garden must be wider*, il faut que le jardin soit plus large. If, when speaking indeterminately as to the person *or* persons, we choose to use the indefinite pronoun *on*, as a nominative to the verb affected by *must* or any equivalent, it is obvious that *il faut que*, etc. may be introduced, as in, *Il faut qu'on soit fou pour agir autrement*, *il faut qu'on étudie pour apprendre une langue*. See the examples above in Obs. I.

III. Sometimes, although the person or persons be determined in English, *il faut* may be used with the infinitive instead of *il faut que* with the subjunctive; but then the person or persons should appear fully determined either before or after, as in *you must not give yourself so much trouble*, il ne faut pas vous donner tant de peine. *If I refuse to see him to-day*, *I must receive him to-morrow*, si je refuse de le voir aujourd'hui, il faudra le recevoir demain. *You are a child*, *said Blanford to her*, *you should have confessed to me the whole*, vous êtes une enfant, lui dit Blanford, il falloit me tout avouer.

IV. Sometimes, instead of *il faut que je*, etc. with the subjunctive, we use *il faut* with the infinitive, and consider the person or persons as affected by *to* (*à*); but this construction can take place only when a pronoun is to stand instead of the person or persons. *They have been obliged to confess the whole*, il leur a fallu tout avouer.

V. *Il faut* (*il falloit*, etc.) before *voir*, *entendre*, etc. may, as well as, *il fait beau* (*il faisoit beau*, etc.) mean *it is* (*it was*, etc.) *fine diversion* or *fun*; *it gives* (*gave*, etc.) *one pleasure*, etc. *Il ne m'échappoit pas un mot qu'ils ne le relevassent comme un trait admirable*; *et il falloit voir l'attention qu'ils avoient tous*

*leux à me présenter de tous les mets*, I did not drop one word but they took it up as an admirable stroke, and it was entertaining to see how attentive they were both of them in offering me of every dish.

VI *S'en falloir*, requires also particular attention. As it intimates of itself *a deficiency*, so on account of its negative signification, it requires the subjunctive in the verb of the action or situation which does not take place on account of that deficiency. Now if *s'en falloir* be presented with a full negative, or in a manner equivalent to a negative form, as with *peu* or with *an interrogation*, the deficiency is removed *or* partly removed *or* becomes doubtful, and therefore *ne* should be prefixed to the subjunctive in order to bring back an affirmation or an approximation to it. From this explanation and the phrases mentioned before the observations, it is presumed that the full force of *s'en falloir*, will easily be recognised in the following phrases. *Tant s'en faut que je le chérisse, qu'au contraire je le hais mortellement*, far from loving him, I mortally hate him. *Il s'en faut bien (beaucoup ou de beaucoup) qu'il me plaise*, he is far from pleasing me, he does not please me by a great deal. *Peu s'en fallut (il s'en fallut peu, il ne s'en fallut guère, il ne s'en fallut de rien) que je ne tombasse*, I was very near falling, a little more and I had fallen.

On [on] (c'est une contraction d'*homme*, d'abord *hom*, et ensuite *on*; comme *l'on* est pour *l'homme*, d'abord *l'hom*,

et ensuite *l'on*), man, any man, one, any person, somebody, any body, every body, men, people, they, we, a woman, women, *etc.* Cet *On* (ou *l'on*), que l'on regarde comme un pronom indéterminé est toujours du singulier en français et ne peut s'employer qu'au nominatif: on le trouve souvent répété dans les phrases complexes et dans une série de phrases; mais il faut bien se garder de l'introduire par répétition pour représenter des personnes différentes de celles que représente le premier *on* (ou *l'on*). On s'en sert surtout pour éviter la forme passive. V. *Réfléchi.* Puisque *On* (ou *l'on*) exprime *quelqu'un* d'une manière indéterminée, il ne peut avoir qu'une expression indéterminée pour le représenter, s'il à l'accusatif, soit à un cas oblique (c'est-à-dire, avec une préposition) soit à un cas redondant; tels sont ces pronoms, *se, soi, soi même*, (en anglais, *one's self*); tel est cet adjectif, *son, sa, ses* (en anglais, *one's*). Ex. *On dit*, people say, they say, it is said. *On lui parle*, some-body speaks to him (*or* to her), he (*or* she) is spoken to. *Qu'en dira-t-on?* what will the world say about it? *Se moquer du qu'en dira-t-on, être au-dessus du qu'en dira-t-on*, not to care what the world will say. *On dit et l'on assure que*, people say and assure that. *On ne me persuadera jamais le contraire*, nobody will ever persuade me to the contrary. *Quand on s'est écarté du sentier de la vertu, on doit tâcher d'y rentrer*, when one has deviated from the path of virtue, he (*or* she) ought to endeavour to get into it again. *On a souvent besoin d'un plus petit que soi*, one has often need of his inferior's assistance. *On peut être belle, et par son affectation, se faire mépriser*, a woman may be handsome, and yet make herself despised through her affectation.

Pour [poor], prép. for, because of, upon the account of, for the sake of, considering, in favour of, in behalf of, on the side of. *Pour cela* (*malgré cela*) nevertheless, for all that; (*pour cette raison*) for that reason, therefore. *Pour cet effet*, therefore, and therefore. *Pour le moins* (*du moins*) at least. *Pour lors*, then, at that time. *Pour l'heure* (*pour*

*le présent*) for the present, as for now. *Chambre pour chambre, j'aime mieux celle-ci que l'autre*, since I must have one of these two rooms, I like this better than the other. *Mourir pour mourir, il vaut mieux mourir en combattant qu'en fuyant*, when a man must die, it is better for him to die in fighting than in running away. ☞ *Pour* will, in general, be properly used with respect to verbs : — 1st. when asking the question *why* or *what for?* after what precedes, the infinitive will come in answer, though the English corresponding expression *for* chiefly requires the participle present. *He will do any thing to oblige you* (*he will do any thing, why?* or *what for?* — *to oblige you*), il fera tout pour vous obliger. *Men are born to work as birds to fly*, les hommes sont nés pour travailler, comme les oiseaux pour voler. — 2dly. When what precedes the infinitive implies *sufficiency* or *excess*. *He has not health enough to undertake that*, il n'a pas assez de santé pour entreprendre cela. *He has too much good sense to do a thing which would prejudice his family*, il a trop de bon sens pour faire une chose qui feroit tort à sa famille. *He is very weak to ride on horseback*, il est bien foible pour monter à cheval. — 3*dly*. When the agent of the second verb is the very agent of the first, the infinitive may be used with the second; but if the agent of the second be different, the infinitive should not come in, unless we speak undeterminately. Now when the use of the infinitive is to be avoided, because that which is the agent is to be expressed, *pour que* may be introduced with the subjunctive. *I was too unlucky for such a thing to happen to me*, j'étois trop malheureux pour qu'une telle chose m'arrivât. — 4*thly*. Sometimes we find one infinitive with *pour* or *afin de*, and then another verb in the subjunctive with *que* (instead of *pour que* or *afin que*) because the agent of the second verb is the very agent of the first, but the agent of the third is a different person or thing. *Ce que j'en fais c'est pour* (*afin de*) *vous convaincre, et que vous n'en doutiez plus*, the reason why I do this is that I may convince you, and that you should doubt it no longer. — 5*thly*. *Pour ne pas* or *afin de ne pas*, may denote fear. *Il a pris des mesures pour ne pas échouer dans son entreprise*, he has taken measures for not miscarrying (for fear of miscarrying, that he might not miscarry, lest he should miscarry) in his enterprise. — 6*thly*. *Pour*, with the infinitive, may be used in other circumstances which the following examples will elucidate : *Les Scythes, pour être* (*encore qu'ils soient, parce qu'ils sont*) *Scythes, cessent-ils d'être des hommes, et pour avoir été* (*parce qu'ils ont été*) *nos ennemis, sont-ils indignes de compassion?* are not the Scythians men, although they are Scythians; and because they have been our enemies, are they unworthy of our compassion? *Corée n'attendoit pas qu'elle achevât pour avouer* (*avant qu'il avouât, mais il avoua aussitôt*) *qu'il avoit tort*, Coree did not wait till she had done before he confessed (but readily confessed) that he was in the wrong. *Souvent pour vouloir* (*en voulant, parce qu'on veut*) *être poli, on donne dans l'affectation*, oftentimes in wishing (because one wishes, while one wishes) to be polite, one sinks into affectation. *Il faut que vous m'aimiez bien peu, pour vous défier* (*vous qui vous défiez*) *ainsi de moi!* you must love me very little, who can thus distrust me! — 7*thly*. *Pour* before an adjective or adverb with *que* and the subjunctive is equivalent to *quelque que* or *tout que*. *Pour protégé qu'il soit* (*quelque protégé qu'il soit, tout protégé qu'il est*) however protected he may be, let him be ever so well protected, protected as he is. *Pour aimable qu'il puisse être*, however amiable he may be, how amiable soever he may be, let him be ever so amiable, amiable as he may be. (See the observation on *Avoir beau* at *Beau*). Hence it is that *pour peu que* with the subjunctive may be englished by *if ever so little*. *Pour peu que je m'étendisse sur cette matière, je pourrois faire voir*, etc., if I enlarged (were I to enlarge) ever so little on that subject, I could show, etc.

Réfléchi, e [rà-flà-shi, shi], adj. reflected. V. Les verbes réfléchis perdent ordinairement le pronom signe de réflexion après *faire*, *voir*, *laisser*, *ouïr* ou *entendre*, ce qui fait paroître ces verbes réfléchis comme des verbes neutres. V. *Cabrer*. Il y a peu de verbes actifs qui ne puissent devenir verbes réfléchis. Ils le deviennent surtout lorsque le verbe neutre manque dans la langue françoise et qu'il s'agit de s'exprimer dans un sens neutre; ils le deviennent encore lorsqu'il s'agit d'éviter la forme passive sans employer *on* ou *l'on*, qui de soi-même peut servir à éviter la forme passive. Or, les François cherchent naturellement à donner à leurs expressions cette activité qui les caractérise: et voilà pourquoi quantité de phrases passives en anglois se présentent en françois avec un verbe réfléchi, parce qu'un verbe réfléchi n'est autre chose qu'un verbe actif, puisque l'agent s'y voit non-seulement au nominatif, mais encore à l'accusatif. *Retirer*, v. a. signifie *to draw back*, v. a. ou *to withdraw*, v. a. or *Retirer* ne pouvant pas être neutre, les François, pour exprimer *to retire*, v. n. ou *to draw back*, v. n. ou *to withdraw*, v. n. disent *se retirer*, dont la vraie valeur est *to draw one's self back*, *to withdraw one's self*. En anglois, l'agent se trouve assez souvent sous-entendu, et le verbe se présente dans un sens passif, dans les occasions où en françois l'on fait entrer *on* ou *l'on* comme agent indéterminé, donnant au verbe pour accusatif ce qui sert de nominatif en anglois, ainsi que dans les occasions où, rendant le verbe réfléchi, on lui donne pour nominatif ce qui est le nominatif du verbe anglois, et pour accusatif un pronom qui a rapport à ce même nominatif. *On dira cela demain*, ou *cela se dira demain*, est en françois l'equivalent de cette expression angloise, *that will be told* or *mentioned to morrow*, pour *people will tell* or *mention that to-morrow*; et *ces bas se font à Nottingham*, ou bien *on fait ces bas à Nottingham*, est la même chose que seroit en anglois, *these stockings are made at Nottingham*. Remarquez surtout que souvent, en françois, lorsque l'agent peut se sous-entendre, on emploie *il* pour nominatif d'un verbe réfléchi, plaçant ce qui devoit être naturellement le nominatif du verbe réfléchi, là où l'on placeroit l'accusatif: et cette sorte de construction est une nouvelle preuve que le génie de la langue françoise emploie, autant qu'il est possible, des tours de phrases où le verbe paroît actif. Un François, pour rendre dans sa langue *a considerable fleet is fitting out at Portsmouth*, dira naturellement *il s'équipe à Portsmouth une flotte considerable*, ou bien *on équipe à Portsmouth une flotte considerable*; pour rendre dans sa langue *men are found* (ou *there are men*) *found of that very disposition*, il dira *il se trouve des hommes de ce même caractère*, ou bien *on trouve des hommes de ce même*

*caractère*. S'étonnera-t-on maintenant de voir que les verbes neutres *se* trouvent souvent présentés en françois sous une forme active, ayant *il* comme une espèce de nominatif d'emprunt, et comme une espèce d'accusatif ce qui devroit naturellement être le nominatif? Un François, pour rendre dans sa langue, *things which never happen to others are daily happening to me*, dira naturellement, *il m'arrive tous les jours des choses qui n'arrivent jamais aux autres*. Voyez d'ailleurs *A* et *De*. La remarque que nous venons de faire sera d'autant plus utile que, dans les dictionnaires, on omet plus de la moitié des verbes réfléchis, et que, dans les grammaires, on n'explique pas les différentes voies que s'est frayées le génie françois soit pour éviter les ambiguités qui résulteroient de la trop fréquente répétition de *on* ou *l'on*, soit pour ne pas confondre *ce qui se fait* avec *ce qui est fait*, soit pour ne pas sortir du vrai caractère de la nation françoise. Un des traits principaux de ce caractère, nous l'avons dit, c'est l'activité.

Sans [sén], prép. (*pour annoncer un défaut d'accompagnement*, c'est alors le contraire de *avec*) without, less, qui placé après le substantif, semble ne faire avec lui qu'un seul mot; (*autre, ne comptant pas*) beside, besides; (*pour annoncer la personne ou la chose qui empêche, a empêché* ou *empêchera*) but for, were it not for, if it were not for, had it not been for, if it had not been for. Donc *sans que* dans le premier sens peut se rendre par *without*; et alors on change ordinairement le nominatif en une espèce d'adjectif ou de cas elliptique et le verbe personnel au subjonctif en un participe présent. Le mot anglois *without* signifie littéralement *be-out*, équivalent de *sois dehors, ôtez*; le mot anglois *less* est l'impératif saxon *les*, qui signifie *ôtez*: on ne s'étonnera donc pas de voir que *sans argent* se rend en anglois par *without money* ou par *money-less*; et *sans amis* par *without friends* ou par *friendless*. Le mot *sans* avant un infinitif se rend ordinairement par *without* avec le participe présent, quelquefois par *not to* avec l'infinitif; *sans parler de*, without speaking of, *ou* not to speak of (pour ne pas parler de). *Sans rien dire*, without saying any thing. *Sans y penser*, without thinking of it, unawares, unwittingly. *Il ne fut pas long-temps sans (avant de) s'en repentir*, he was not long before he repented it. *Sans (outre, ne comptant pas) les autres dépenses que j'ai faites*, beside the other expenses I have been at. *Il le fit sans ma connoissance* (ou *je ne le savois pas*), he did it without my knowledge *or* without my knowing it. *Vous ferez bien cela sans que j'y aille*, sure you will do that without my going thither. *Il viendra sans que vous l'envoyiez chercher*, he will come without your sending for him. *Il viendroit sans que votre sœur l'envoyât chercher*, he would come without your sister's sending for him, *ou* he would come without your sister sending for him *ou* he would come though your sister should not send for him. *Je partirois demain sans votre frère*, peut, dans le premier sens, se rendre par *I should set out to*

*morrow without your brother*, et dans le troisième sens par *I should set out but for your brother*. Dans le premier sens, *votre frère ne m'accompagneroit pas*; dans le troisième sens, *votre frère m'empêche de partir*. Donc *sans moi il mourroit de faim* (pour *il mourroit de faim, mais je l'en empêche par mes secours*) doit se rendre par *but for me he would starve* ou par quelque autre équivalent.

Subjonctif [sub-zonk-tif], adj. et s. m. subjunctive. *Le mode subjonctif* ou *le subjonctif*, s. m. the subjunctive mode or the subjunctive.

*The French subjunctive is a stumbling-block to foreigners, nor can the natives of France account properly for its use, except those who have read the works which the editor has lately published; the principal observations of which are as follows.*

*The French subjunctive is used only on account of a* circumlocution by which the verb *of that action or situation which is the principal subject of the discourse* is (*by means of the conjunction* que; *or of a conjunctive pronoun, such as* qui, que, dont, quoi, où, *etc.*) rendered [illegible] *another verb*, which deprives it of its natural function or form or of that full tone of sou[illegible] affection of the mind with which that verb would be pronounced if employed singly. *Hence*, (1*st.*) *when the* imperative *or* optative force *is announced merely by* que *or by a verb and then* a conjunctive expression, *the action or situation either commanded or wished for, must be in the subjunctive, because the natural form the French have as to the imperative can be only for the second person either singular or plural, and for the first person plural, each without* que. Ex. *It is proper you should take your precautions* (*or take your precautions* with the tone of advice) il est à propos que vous preniez vos précautions. *Obs. When the* interrogative form without negation is transposed *from the main verb or* is some-

now disguised, *and announced by another which is or might be made to precede this, that main verb, thus deprived of its interrogative form, must be in the subjunctive.* ... *Do you believe he intends to speak*], sub. being nearly equal to *does he intend to speak of it?*) croyez-vous qu'il ait dessein d'en parler? *3dly. When the* negative form without interrogation is transposed *from the main verb* or is somehow disguised, *and announced by another verb, which is or might be made to precede this, that main verb, thus deprived of its negation, must be in the subjunctive: now, after most of the superlative expressions, the subjunctive appears in French, because those expressions which are really superlative imply that the qualities of the individual mentioned do* not *exist in the same degree in the other individuals.* Ex. *I do not believe that he intends to speak of it* (being nearly equal to *he does not intend to speak of it*) je ne crois pas qu'il ait dessein d'en parler. *He is the greatest orator I ever knew,* (*I never knew a greater orator*) c'est le plus grand orateur que j'aie jamais connu. *4thly.* When the main verb might appear or should naturally appear in an affirmative or nearly affirmative manner, *but the* sentence has been begun negatively or in a manner equivalent, *it is obvious that a deviation from the natural form has taken place; therefore the main verb must be in the subjunctive; and, if the main verb is not negative in itself, as the previous force of the negation or its equivalent must be destroyed, another* ne *must be used with the subjunctive, whereby the sense of the whole sentence is* [illegible] *back to be affirmative or nearly so.* Ex. *I do not see any body but one that he is rash* (*every body agree that he is rash*) je ne vois personne qui ne convienne qu'il est téméraire. *5thly. Nature has endowed us with a* particular tone of the voice *and* expression of countenance *for every* affection of the mind; *she has pointed out to us that* this tone and change of countenance ought to accompany the verb which causes the affection *of* pleasure, displeasure, fear, horror, surprise, *etc. therefore, if the tone be announced by a verb which is made or might be made to precede that main verb which creates the affection, that tone and the expression of the countenance will be considerably lessened by the construction of the sentence, and consequently the subjunctive must be used with the main verb, because it becomes deprived of that tone, or at least of part of that tone, which should naturally accompany it. Now, whether the affection be announced affirmatively or negatively, etc. is a point which is quite immaterial. I am sorry that he is come* (*he is come!* pronounced with the tone of sorrow). Je suis fâché qu'il soit venu.

☞ *The intelligent reader will easily perceive by the second and third observations that as a negative form has the same power with an interrogative form, it may be inferred that a* verb used negatively and interrogatively at the same time *has no more influence upon the other verb governed by it than that verb could have if employed simply in the affirmative form; he will easily perceive that* dubitative expressions *are to be considered as interrogative expressions, upon recollecting that doubts can be cleared up only by enquiries*, etc.
